PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and maintained **SQL based audit mechanisms** to validate data accuracy between warehouse management systems and downstream data warehouse, identifying and resolving an average of **~15 data discrepancies per week**.
- Root-caused data discrepancies by analyzing system logs and transaction data, triaged and prioritized incidents by business impact, and drove resolution through internal engineering teams and **third-party service providers**.
- Developed and formalized **data standards, policies, and governance strategies**, ensuring compliance against established organizational requirements for data integrity.
- Defined and tracked **data quality health metrics**, developing scorecards and system health reports for leadership review and quarterly business reviews (QBRs).
- Collaborated with **data engineering** to identify reporting gaps between source and downstream systems, influencing architecture and enabling new system data integration.
- Validated data accuracy in **staging environments** prior to production releases, working closely with vendor product managers to ensure successful deployments.
- Managed **production support** for enterprise systems, including SLA management and P1/P2 incident response using tools like **Splunk** and **Dynatrace**.

SKILLS

Data Governance – Data Standards, Data Policies, Data Governance Strategies, Data Quality Metrics, Audit Mechanisms

Database & Data Warehousing – SQL, PostgreSQL, MySQL, Oracle, Data Warehouse, Data Modeling, Data Extraction

Cloud & Operations – AWS, EC2, S3, Lambda, CloudWatch, Linux, Shell Scripting, Cron Jobs

Programming & Scripting – Python, Java, Spring Boot, REST APIs, Pandas, NumPy

DevOps & CI/CD – Jenkins, Git, Docker, Code Reviews, Jira, Confluence

Business Intelligence & Analytics – Power BI, Tableau, DAX, Power Query, Business Intelligence Theory

PROJECTS

Data Integrity Auditing System (HCL Technologies)

- Developed a suite of **Python scripts** to automate data validation checks across multiple PostgreSQL and Oracle databases used in financial operations.
- Implemented **scheduled reporting** using Python and SQL to highlight data anomalies and inconsistencies for the payments operations dashboard, reducing manual review time by **~30%**.
- Contributed to the design and implementation of **data quality metrics** and dashboards within Splunk for real-time monitoring of transaction processing flows.

Enterprise System Data Reconciliation Framework

- Engineered **ETL pipelines** using Python and SQL to reconcile data between ERP modules and custom operational platforms, ensuring consistency across integrated systems.
- Designed and built **REST APIs** using Java Spring Boot for data exchange between interconnected systems, supporting change management initiatives and post-go-live support.
- Performed ad-hoc **SQL queries** and data validation on large datasets (millions of records) to support business analysts in UAT coordination and issue triage.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
