PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and deployed network infrastructure across multiple AWS global data centers and transit centers, automating deployment processes to increase velocity and quality for **enterprise customers**.
- Collaborated closely with internal customers to translate network designs from concept to production, ensuring solutions met **demand for scaling** across diverse network fabrics.
- Created and implemented network changes, automating workflow execution on a global scale to support the deployment of new network technologies.
- Developed Python scripts to automate the deployment and configuration of network infrastructure, integrating with **version control tools** like Git for change tracking.
- Managed and troubleshot network issues using tools such as **ping**, **traceroute**, and packet capture analysis, ensuring high availability for critical services.
- Worked closely with automation teams to transition and define new tools, enabling the scaling of network deployments at unprecedented volume.
- Containerized network management tools and services using **Docker**, deploying them onto **AWS EC2** instances for improved operational efficiency.

SKILLS

Networking – BGP, OSPF, Network Deployment, Network Scaling, Network Standards, Network Troubleshooting

Cloud Platforms – AWS, EC2, S3, Lambda, CloudWatch

Programming & Scripting – Python, Java, Bash Scripting

Automation & Tools – Jenkins, Git, Docker, Ansible, Terraform

Protocols – HTTP/S, TCP/IP

Databases – PostgreSQL, MySQL, Oracle

PROJECTS

Automated AWS Network Fabric Deployment

- Developed Python scripts to automate the provisioning and configuration of AWS network infrastructure, including VPCs, subnets, and routing tables.
- Implemented **Ansible playbooks** to manage network device configurations, ensuring consistency and compliance across **AWS EC2** instances and network fabrics.
- Integrated automation scripts with **Jenkins CI/CD pipelines** for automated testing and deployment, reducing manual deployment time by approximately 40%.

Network Monitoring and Observability Pipeline

- Built a Python-based data pipeline to ingest network telemetry data from various sources, including logs and metrics, into **AWS S3** for analysis.
- Created dashboards using **Splunk** to visualize network performance, identify anomalies, and monitor key performance indicators for enterprise services.
- Designed and implemented alerting mechanisms using **AWS CloudWatch** to notify operations teams of critical network events and potential issues.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
