PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **Python** scripts to automate data extraction and transformation for scheduled operational reports, processing approximately 500GB of data weekly.
- Developed and maintained **Java Spring Boot** REST APIs for internal microservices, ensuring seamless data exchange across disparate enterprise systems.
- Managed production incidents for enterprise applications on **AWS** using **Splunk** and **Dynatrace**, resolving P1/P2 issues within defined SLAs.
- Wrote and optimized **SQL** queries across **PostgreSQL** and **Oracle** databases for data validation and schema evolution tasks, supporting 3 distinct business systems.
- Containerized **Java** applications using **Docker**, facilitating consistent deployment pipelines via **Jenkins** and enabling efficient resource utilization on **EC2** instances.
- Authored technical documentation and contributed to **Agile** sprint planning, providing effort estimations for new feature development and defect resolution.
- Executed change-control management procedures for system configuration updates, coordinating User Acceptance Testing and providing post-go-live support across interconnected enterprise platforms.

SKILLS

Languages – Python, Java, SQL, Shell Scripting

Frameworks/Libraries – Spring Boot, pandas, NumPy, scikit-learn, Flask, FastAPI

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Databases – PostgreSQL, MySQL, Oracle

DevOps/Tools – Docker, Jenkins, Git, Jira, Confluence, Splunk, Dynatrace

Networking – IP Networking, BGP, OSPF, Network Troubleshooting, Network Hardware, Packet Forwarding Architectures

PROJECTS

Automated Network Diagnostics Tool

- Developed a **Python** CLI tool to automate network device health checks by parsing **SSH** output and executing diagnostic commands across a fleet of **Linux**-based network controllers.
- Integrated **IP Networking** fundamentals to simulate common failure scenarios, identifying potential bottlenecks and generating detailed diagnostic reports for network engineers.
- Implemented robust error handling and logging mechanisms, reducing manual troubleshooting time for common network issues by an estimated **30%** for the operations team.

Network Configuration Management System

- Built a **Java Spring Boot** application to manage and version control network device configurations, interacting with a **PostgreSQL** database for state persistence.
- Designed REST APIs to facilitate programmatic updates and retrieval of configurations, supporting automated deployment workflows and compliance checks for network hardware.
- Incorporated **BGP** and **OSPF** protocol logic into validation rules, ensuring adherence to established routing policies before applying configuration changes to network infrastructure.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
