HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and deployed **Python** automation scripts for network device configuration backups and compliance checks, processing over 500 devices daily.
- Engineered **Linux** systems for network monitoring and data collection, integrating custom scripts with **Bash** and **Python** to aggregate logs from thousands of network nodes.
- Developed and maintained **Java Spring Boot** REST APIs for internal tooling that managed network infrastructure inventory and reporting, handling approximately 1,500 requests per hour.
- Contributed to the development and implementation of network changes, working within a **Linux** environment and utilizing **Unix** systems engineering best practices.
- Collaborated with automation teams to define requirements for tools that enable scaling of network operations, focusing on repeatable and sustainable solutions.
- Operated and troubleshot network routing, interconnectivity, platform, and performance issues, including interaction with **Unix** systems and new networking software tools.
- Managed scheduled work and on-call rotation within a 24x7 team environment, ensuring high levels of alertness and attention to detail during critical network events.

SKILLS

Networking Protocols – BGP, OSPF, MPLS, TCP/IP

Operating Systems – Linux, Unix

Programming Languages – Python, Bash, Shell Scripting, Perl, Java, Spring Boot

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Tools & Technologies – Docker, Jenkins, Git, Jira, Confluence, Splunk, Dynatrace

PROJECTS

Network Automation for Device Configuration Management

- Developed a **Python**-based framework to automate the backup and validation of network device configurations across a fleet of **Linux**-managed switches and routers.
- Integrated the automation framework with **Jenkins** for scheduled execution and error reporting, reducing manual configuration audit time by 40% for the operations team.
- Implemented robust error handling and logging using **Bash** and **Python**, ensuring reliable data collection and compliance with internal network standards.

Scalable Network Telemetry and Monitoring System

- Designed and deployed a distributed system using **AWS Lambda** and **Python** to collect and process network telemetry data from thousands of devices globally.
- Engineered data ingestion pipelines that parsed diverse network logs and metrics, enabling real-time performance monitoring and anomaly detection.
- Collaborated with SRE teams to integrate telemetry data into existing observability platforms, providing crucial insights for network stability and optimization.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
