PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented interactive telemetry exploration views within a **cloud observability platform**, translating complex, high-cardinality data streams into actionable insights for engineers.
- Developed AI-assisted diagnostic workflows for an **observability agent**, enabling engineers to investigate and resolve system issues with human-in-the-loop guidance.
- Collaborated with Product Managers and engineers to define feature requirements for **telemetry analysis tools**, iterating on designs based on technical feasibility and user feedback.
- Built interactive prototypes using **JavaScript and HTML** to communicate design intent for new observability features, facilitating rapid feedback cycles with development teams.
- Enhanced the discoverability of system behavior by transforming **fast-moving telemetry and agent activity** into comprehensible visualizations for incident triaging.
- Contributed to the evolution of a **shared design system** by creating and extending reusable UI patterns for cloud operational tools.
- Managed and responded to P1/P2 incidents for enterprise Java applications, performing root cause analysis and implementing fixes to meet strict **production support SLAs**.

SKILLS

Cloud Observability – AWS CloudWatch, Telemetry, Logs, Metrics, Traces, Agent

Design Tools – Prototyping, IA, Interaction Design, Visual Craft, Usability Testing

Programming & Scripting – Python, Java, SQL, JavaScript, HTML, CSS

Cloud Platforms – AWS, EC2, S3, Lambda, CloudWatch

Development Methodologies – Agile, Scrum, CI/CD, Git, Code Reviews

Data Analysis & BI – Power BI, Tableau, DAX, Power Query, R, pandas

Backend Frameworks – Spring Boot, REST APIs, Flask, FastAPI

PROJECTS

Cloud Telemetry Visualization Suite (HCL Technologies)

- Engineered interactive dashboards using **Power BI** to display operational metrics and transaction flow data for a financial services client, enabling faster issue identification.
- Developed Python scripts to automate the extraction and transformation of data from relational databases (**PostgreSQL, Oracle**) for reporting and analysis, reducing manual effort by 40%.
- Implemented data models within Power BI to support complex DAX calculations for key performance indicators, enhancing the accuracy and depth of business insights.

AI-Assisted Incident Triage Agent

- Designed an agentic workflow where an AI model analyzes system logs and metrics to propose root causes for incidents, presenting findings to engineers for approval.
- Developed mockups and prototypes simulating the agent's interaction, focusing on clear communication of AI-generated hypotheses and actionable next steps for human operators.
- Integrated with simulated telemetry streams to demonstrate the agent's ability to process and correlate diverse data sources in near real-time.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
