HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and deployed **Java Spring Boot** microservices for asynchronous processing of customer requests, handling approximately **4,500 requests per minute** during peak loads.
- Implemented robust error handling and retry mechanisms within **Java** applications, improving system resilience and reducing P1 incidents by **18%**.
- Integrated **JPA and Hibernate** with a PostgreSQL database to manage complex data models for user profiles and application configurations, ensuring data integrity across transactions.
- Authored and reviewed **Python scripts** to automate data extraction and transformation tasks for operational reporting, decreasing manual effort by **over 10 hours per week**.
- Designed and maintained **CI/CD pipelines using Jenkins and Git**, enabling automated builds, testing, and deployments to AWS EC2 instances for a team of 5 engineers.
- Participated in **on-call rotations**, responding to production incidents across enterprise applications and performing root cause analysis using **Splunk and Dynatrace** logs to restore service within SLA targets.
- Containerized backend services using **Docker** and configured basic resource limits, facilitating consistent deployment environments across development and production on **AWS EC2**.

SKILLS

Languages – Java, Python, SQL, Shell Scripting

Frameworks & Libraries – Spring Boot, Hibernate, JPA, pandas, NumPy, scikit-learn, Flask

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Kubernetes

Databases – PostgreSQL, MySQL, Oracle

Observability & Monitoring – Splunk, Dynatrace

Tools & Methodologies – Jira, Confluence, Agile, Scrum

PROJECTS

Enterprise Java Application Modernization

- Refactored a monolithic **Java** application into a suite of **Spring Boot** microservices, improving modularity and enabling independent deployment cycles.
- Implemented asynchronous communication patterns using Kafka for inter-service messaging, processing over **2,000 events per second** across critical workflows.
- Integrated **JPA and Hibernate** for data persistence, optimizing database queries and introducing efficient caching strategies that reduced average response times by **30%**.

Automated Data Pipeline for Operational Insights

- Developed a **Python**-based data pipeline to aggregate and transform logs from disparate enterprise systems into a centralized data lake on **AWS S3**.
- Created scheduled ETL jobs using **pandas** and SQL to prepare data for reporting, supporting the generation of weekly operational performance summaries.
- Containerized the pipeline components with **Docker** for reproducible execution and deployed them as scheduled tasks on an **AWS EC2** instance.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
