PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Architected and developed distributed systems for next-generation datacenter networking, focusing on automation and network visibility tools for internal operators.
- Designed and built Python-based ETL pipelines to process and transform large volumes of operational data for analysis and reporting, improving data accessibility for downstream teams.
- Implemented Java Spring Boot microservices to handle core business logic, including RESTful API development and integration with PostgreSQL databases.
- Authored comprehensive software design documentation and collaborated with Principal Engineers to ensure the successful rollout of new network components.
- Owned the operational excellence of production software systems, including monitoring, incident response, and performance tuning using tools like Splunk and Dynatrace.
- Contributed to the improvement of team processes and tools, developing runbooks and documentation that streamlined new engineer onboarding and reduced common issue resolution times by approximately **15%**.
- Containerized network automation tools using **Docker** and deployed them onto **AWS EC2** instances, ensuring consistent environments across development and production.

SKILLS

Languages – Java, Python, SQL, Bash

Frameworks & Libraries – Spring Boot, Spring Cloud, Hibernate, JPA, pandas, NumPy, scikit-learn, Flask, FastAPI

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes (basics)

Databases – PostgreSQL, MySQL, Oracle

Tools & Technologies – Jenkins, Git, Jira, Confluence, Splunk, Dynatrace, Linux

Concepts – REST APIs, Microservices, ETL, Data Pipelines, Object-Oriented Programming, Agile Methodologies, Network Automation, Data Modelling

PROJECTS

Datacenter Network Automation Suite

- Developed a suite of Python scripts and Java microservices to automate the provisioning and configuration of datacenter network devices, reducing manual configuration time by **40%**.
- Integrated with internal APIs to gather network topology data and present it through a RESTful interface, enhancing network visibility for operations teams.
- Designed and implemented asynchronous task processing using **Celery** and **Redis** to handle high-volume configuration requests without blocking critical paths.

Operational Data Pipeline for Network Insights

- Built a scalable data pipeline using **Python** and **Pandas** to ingest, clean, and transform network telemetry data from various sources into a centralized data store.
- Created scheduled reports and automated alerts based on processed data, providing timely insights into network performance and potential issues to engineering stakeholders.
- Applied **SQL** for data validation and querying, ensuring data integrity and enabling ad-hoc analysis of historical network traffic patterns.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
