PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and deployed **network access solutions** for wireless (Wi-Fi 6/7) and wired (802.1X) environments across global fulfillment sites, ensuring seamless connectivity for operations.
- Developed **automation frameworks** for network configuration and compliance validation, reducing manual effort by approximately **40%** for routine tasks.
- Enabled **self-healing operations** by creating automated remediation workflows and anomaly detection models for wireless infrastructure, improving network resilience.
- Collaborated with firmware, field operations, and infrastructure engineers to **pressure-test network designs** and influence decisions with data-driven insights.
- Mentored junior engineers on **network automation best practices** and conducted technical reviews for new access point deployments.
- Owned end-to-end delivery of complex network engineering projects, from **requirements gathering** through deployment and validation.
- Containerized network automation tools using **Docker** and deployed them to a scalable environment on **AWS EC2** for enhanced manageability.

SKILLS

Networking – Wireless (Wi-Fi 5/6/6E/7), Wired (802.1X, NAC), TCP/IP, IP routing, OSPF/IS-IS, BGP, MPLS, Server Load Balancers, Firewalls, ACLs, DNS, DHCP, IPAM, RADIUS

Automation & Scripting – Python, Java, Bash, Shell scripting, Perl, PHP, Ruby

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes

Network Hardware – Cisco, Juniper, Alcatel-Lucent, Arista, Brocade, Extreme, F5

Wireless Fundamentals – RF fundamentals, Site survey methodologies, Capacity planning

Development Practices – Agile, Scrum, CI/CD, Git, Code Reviews

PROJECTS

Global Wireless Network Automation Platform

- Engineered a Python-based automation platform to manage network configurations across thousands of wireless access points globally, integrating with **Cisco WLCs**.
- Developed automated workflows for zero-touch deployment of new network hardware, reducing deployment time for individual sites by an average of **30%**.
- Implemented anomaly detection logic using statistical analysis on operational logs to proactively identify and alert on potential network issues.

Automated Network Compliance and Validation Tool

- Built a **Java Spring Boot** application with a REST API to perform automated compliance checks against network device configurations, ensuring adherence to security policies.
- Integrated the tool with **Jenkins** for continuous integration and automated execution during network change deployments, catching configuration drift in **95%** of test cases.
- Designed a modular architecture allowing for easy extension to support new network hardware vendors and compliance standards.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
