PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Provided L1/L2 technical support for enterprise client inquiries, diagnosing and triaging issues related to outsourced technology services within the investment funds domain, ensuring timely resolution against defined SLAs.
- Assessed the business impact of reported incidents, coordinating with internal R&D; and Client Success teams to escalate complex technical challenges and drive client satisfaction.
- Developed Python scripts for automating data extraction and report generation, streamlining operational workflows and reducing manual processing time for financial transaction data.
- Managed incident response and production support for enterprise applications using **Splunk** and **Dynatrace**, performing root cause analysis and implementing fixes to maintain service availability.
- Designed and implemented REST APIs using **Java Spring Boot** for cross-system integrations, facilitating data exchange between operational platforms and enterprise business systems.
- Collaborated with cross-functional teams including business analysts and operations personnel to gather requirements, support user acceptance testing, and perform post-implementation triage on system changes.
- Containerised Java applications using **Docker** and managed deployments within an **AWS EC2** environment, contributing to a more stable and scalable production infrastructure.

SKILLS

Client Support & Operations – L1/L2 Support, Incident Triage, SLA Management, Client Inquiries, Issue Diagnosis, Business Impact Assessment, Root Cause Analysis, Production Support, On-Call Rotation

Programming Languages – Java, Python, SQL, R

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn, Hibernate, JPA, Flask, FastAPI

Databases & Data Warehousing – PostgreSQL, MySQL, Oracle, SQL, Data Modelling, ETL, Power Query

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Linux, Shell Scripting

BI & Analytics Tools – Power BI, Tableau, DAX, RStudio

Enterprise Systems & Methodologies – ERP Integration Support, Agile, Scrum, Jira, Confluence, GDPR Awareness

PROJECTS

Financial Operations Dashboard Enhancement

- Developed new features and resolved defects for a payments operations dashboard supporting a financial-services client, focusing on transaction monitoring and operational alerting for failed payment messages.
- Wrote **Python** scripts to automate data ingestion and transformation processes, enabling faster reconciliation of transaction workflows and improving data accuracy for operational reporting.
- Collaborated with client operations teams to refine alert thresholds and reporting metrics, enhancing the dashboard's utility in identifying and resolving critical payment processing issues.

Client Onboarding Automation Tool

- Engineered a **Python**-based tool to automate key aspects of client onboarding for enterprise software services, reducing manual setup time and ensuring consistent configuration.
- Integrated the tool with internal ticketing systems (**Jira**) and documentation platforms (**Confluence**) to streamline the process and provide clear audit trails for each onboarding instance.
- Designed a user-friendly interface for the automation tool, enabling customer success managers to initiate and monitor onboarding progress efficiently, reducing average onboarding duration by approximately 15%.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
