# HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

## PROFESSIONAL EXPERIENCE — 3.5 YEARS

**Software Engineer — HCL Technologies, Chennai, India** Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** REST APIs for inter-service communication, handling approximately 5,000 requests per minute.
- Refactored complex **SQL** queries across **PostgreSQL** and **Oracle** databases, improving data retrieval performance for critical financial reports by an average of **30%**.
- Automated daily reconciliation workflows using **Python** scripts, reducing manual processing time by **15 hours** per week for the operations team.
- Designed and implemented interactive **Power BI** dashboards to visualize key performance indicators for fund operations, enabling stakeholders to monitor transaction volumes and settlement rates.
- Managed production incidents for enterprise applications using **Splunk** and **Dynatrace**, resolving P1/P2 escalations within defined Service Level Agreements (SLAs) and documenting root causes.
- Collaborated with business analysts and operations teams to gather requirements for enhancements to a financial-services dashboard, supporting UAT cycles and post-implementation triaging.
- Containerized a Java Spring Boot application using **Docker** and deployed it to an **AWS EC2** instance, establishing a basic CI/CD pipeline with **Jenkins** for automated builds and deployments.

## SKILLS

**Languages** – Java, Python, SQL, R

**Frameworks/Libraries** – Spring Boot, pandas, NumPy, scikit-learn

**Databases** – PostgreSQL, MySQL, Oracle

**Cloud/DevOps** – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

**BI/Analytics Tools** – Power BI, Tableau, DAX, Power Query

**Monitoring/Observability** – Splunk, Dynatrace

**Other** – REST APIs, Agile/Scrum, Linux, Jira, Confluence

## PROJECTS

### Financial Operations Dashboard Enhancement (HCL Technologies)

- Developed new Java modules to parse and validate incoming transaction messages for a payments operations dashboard, ensuring data integrity for approximately 10,000 transactions daily.
- Automated the generation of daily operational reports using Python and SQL, consolidating data from multiple sources and reducing manual reporting effort by 8 hours per week.
- Implemented real-time alerting for failed or stalled payment messages by integrating with monitoring tools, enabling the operations team to proactively address issues and maintain service levels.

### Investment Fund Performance Analysis Dashboard

- Designed and built a comprehensive **Power BI** dashboard visualizing key performance metrics for investment funds, including AUM, total return, and expense ratios, across multiple fund types.
- Developed complex **DAX** measures and optimized data models within Power BI to support interactive slicing and dicing of fund performance data by investment strategy, geography, and asset class.
- Extracted and transformed historical fund data using **Power Query**, integrating data from various internal and external sources to create a unified dataset for analysis and reporting to business stakeholders.

## EDUCATION

**M.Sc. Data Analytics — National College of Ireland, Dublin** Feb 2026

**B.E. Computer Science — SNS College of Technology, Coimbatore, India** 2021

## CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
