# HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

## PROFESSIONAL EXPERIENCE — 3.5 YEARS

**Software Engineer — HCL Technologies, Chennai, India** Sep 2021 – Jan 2025

- Coordinated product incident response activities across multiple software product lines, managing external and internal vulnerability findings from initial report to remediation verification.
- Partnered with **software engineering teams** to triage reported vulnerabilities, develop and test remediation strategies in alignment with the PSIRT process.
- Assisted with **security assessments** of new product developments, ensuring compliance with industry standards and best practices for secure software lifecycles.
- Communicated effectively with external security researchers and internal stakeholders regarding vulnerability status, findings, and remediation progress.
- Developed **Python automation scripts** to parse security alert logs and correlate findings from disparate monitoring tools, reducing manual triage time by approximately **30%**.
- Supported production environments for enterprise applications, performing **incident response** for P1/P2 issues and managing SLAs using **Splunk** and **Dynatrace**.
- Containerised and deployed **Java Spring Boot** microservices to **AWS EC2** instances, configuring basic resource limits and monitoring via **CloudWatch**.

## SKILLS

**Security** – Product Security Incident Response, Vulnerability Management, Incident Response, Security Assessments, PSIRT Process, Security Fundamentals, Remediation, Threat Analysis

**Software Development** – Java, Spring Boot, Python, REST APIs, Software Applications, Web Applications, Microservices

**Cloud & DevOps** – AWS, EC2, S3, Lambda, CloudWatch, Docker, CI/CD, Jenkins, Git

**Databases** – SQL, PostgreSQL, MySQL, Oracle

**Monitoring & Logging** – Splunk, Dynatrace

**Operating Systems** – Linux, Shell Scripting

**Data Analysis & BI** – Power BI, Tableau, DAX, Power Query, Data Modelling

## PROJECTS

### Enterprise Application Security Hardening

- Analyzed and enhanced security configurations for a suite of **Java Spring Boot** enterprise applications deployed on **AWS**, reducing potential attack vectors.
- Implemented automated security checks within the **Jenkins CI/CD pipeline** to flag common vulnerabilities during code commits and build phases.
- Developed **Python scripts** to automate the collection and analysis of security logs from **Splunk**, identifying anomalous patterns indicative of potential incidents.

### Automated Security Triage and Reporting

- Designed and built a **Python-based tool** to ingest security alerts from multiple sources, performing initial triage and generating summary reports for the security operations team.
- Integrated the tool with **PostgreSQL** to store historical alert data, enabling trend analysis and identification of recurring security weaknesses.
- Created **Power BI dashboards** to visualize key security metrics, alert trends, and remediation status for leadership, improving visibility into the security posture.

## EDUCATION

**M.Sc. Data Analytics — National College of Ireland, Dublin** Feb 2026

**B.E. Computer Science — SNS College of Technology, Coimbatore, India** 2021

## CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
