PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Gathered and defined test automation requirements for a new enterprise resource planning (ERP) module integration, coordinating with business analysts and the development team to ensure alignment with project goals.
- Developed a comprehensive project plan for implementing a new test solution framework across **3 legacy projects**, including resource allocation, timeline definition, and risk assessment.
- Configured and managed **PostgreSQL** relational database environments for build and test automation, ensuring data integrity and accessibility for CI/CD pipelines.
- Assisted in the integration of **Java Spring Boot** test solution frameworks, providing support and troubleshooting for development teams adopting the new tooling.
- Administered **Linux** operating systems for virtual build and test environments, including user management, package installation, and system monitoring.
- Supported the installation and configuration of **code coverage tools**, such as GCOV, integrating them into CI pipelines to monitor test automation quality across multiple software components.
- Developed and deployed **Github Actions** to automate build, test, and deployment processes for a new backend service, reducing manual intervention by **40%**.

SKILLS

DevOps & CI/CD – CI/CD, Jenkins, Git, Bitbucket, Artifactory, Github Actions, Agile methodology

Testing & QA – Test Automation, Software Testing, Code Coverage, GCOV, GCC, Coverity, JUnit, Test Automation Frameworks

Scripting & Languages – Python, Bash, Shell Scripting, C, C++, Java, SQL

Databases – Relational Databases, PostgreSQL, SQL, MongoDB, InfluxDB

Operating Systems & Virtualization – Linux, Docker, Container Technologies, Virtual Systems, Cross-Platform Development

Tools & Platforms – Jira, Confluence, Visual Studio, REST APIs, CloudSmith, OpenShift

PROJECTS

Test Automation Framework for Embedded Systems (HCL Technologies)

- Designed and implemented a **Python**-based test automation framework for embedded software components, integrating with **Git** for version control and **Jenkins** for CI/CD.
- Developed reusable test scripts using **Bash** and **Python** to automate build, configuration, and deployment processes for cross-platform applications.
- Configured **Docker** containers to provide consistent and isolated build and test environments, improving reliability and reducing setup time for the QA team.

CI Pipeline Enhancement for Financial Operations Dashboard (HCL Technologies)

- Enhanced the **CI/CD pipeline** for a financial operations dashboard using **Jenkins** and **Git**, automating build and deployment stages for **Java Spring Boot** services.
- Integrated **Jira** for defect tracking and sprint management, improving visibility into the development lifecycle and facilitating collaboration with cross-functional teams.
- Supported the configuration of **PostgreSQL** databases within the pipeline to ensure seamless data integration and validation for new feature rollouts.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
