PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and debugged embedded software for **datacenter power modules** on Linux-based systems, utilizing **C** and **Python** for test automation and validation.
- Designed and implemented lab test benches for characterization and validation of **datacenter power solutions**, integrating hardware and software components.
- Authored system application datasheets and customer-facing documentation for **datacenter infrastructure** hardware, detailing integration requirements and performance specifications.
- Integrated next-generation **datacenter power and thermal solutions**, performing mixed-signal system debug and collaborating with cross-functional teams.
- Contributed to the definition and documentation of system application requirements for **datacenter PCBs and SoCs**, ensuring alignment with customer application needs.
- Managed production incident response for enterprise Java/.NET applications, achieving SLA adherence for P1/P2 issues across a portfolio of 15+ critical systems.
- Containerized enterprise applications using **Docker** and deployed to **AWS EC2** instances via Jenkins CI/CD pipelines, improving deployment consistency by 40%.

SKILLS

Programming Languages – C, C++, Rust, Python, Java, SQL, R, DAX

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Datacenter Infrastructure – Power Systems, Thermal Solutions, PCBs, SoCs, Servers, Storage, Networking Equipment, Cooling Systems

Development Tools – Git, Jenkins, Jira, Confluence, Docker, Linux, Shell Scripting

Data Analytics & BI – Power BI, Tableau, pandas, NumPy, scikit-learn, Data Modelling, ETL, Power Query

System Debugging – Mixed-Signal Systems, Lab Equipment, Hardware Integration, Software Integration

PROJECTS

Datacenter Power Module Validation Framework

- Developed a Python-based framework for automated testing and characterization of **datacenter power modules**, integrating with lab equipment via SCPI commands.
- Designed and implemented test cases to validate performance against system application requirements, including load transient response and thermal profiling.
- Documented the test bench setup and validation procedures, enabling faster onboarding for new engineers joining the **datacenter solutions** team.

Enterprise Application Observability Enhancement

- Engineered Python scripts to parse and aggregate logs from **Java Spring Boot** applications and **.NET services**, feeding critical metrics into **Splunk** for enhanced operational visibility.
- Automated the generation of daily operational summary reports for key business metrics related to transaction processing, reducing manual effort by approximately 8 hours per week.
- Implemented automated alerts for critical system events and SLA breaches within the **Splunk** monitoring platform, reducing mean time to detect (MTTD) by 20%.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
