PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed end-to-end operational stability for multiple critical financial services programs, ensuring program financial health and operational uptime.
- Provided operational insights and reporting through custom dashboards, guiding strategic decision-making for a cross-functional team of 8.
- Contributed to the development and management of financial forecasts and supply chain mapping for enterprise-level operations.
- Streamlined and automated key operational processes using Python scripting, reducing manual effort by approximately **30%**.
- Collaborated with cross-functional teams to define requirements and implement process improvements, enhancing customer experiences.
- Supported programs impacting revenue recognition and regulatory compliance by ensuring data integrity and accurate transaction tracking.
- Containerized Java Spring Boot services using **Docker** and deployed them to **AWS EC2** instances, improving deployment consistency.

SKILLS

Cloud & Infrastructure – AWS, EC2, S3, Lambda, CloudWatch, Docker

Programming Languages – Java, Spring Boot, Python, SQL

Databases – PostgreSQL, MySQL, Oracle

Operations & Support – Splunk, Dynatrace, Jenkins, Jira, Confluence, Linux Shell Scripting

Data Analysis & BI – Power BI, Tableau, DAX, Power Query, R, pandas, NumPy, scikit-learn

Methodologies – Agile, Scrum

PROJECTS

Enterprise Financial Operations Dashboard

- Developed a comprehensive **Java Spring Boot** application to monitor transaction flows and operational alerts for a financial services client, supporting **~3,200** failed payment messages weekly.
- Implemented real-time data ingestion and processing pipelines using **Python** and **SQL**, ensuring timely updates for critical operational metrics displayed on the dashboard.
- Integrated with **PostgreSQL** and **Oracle** databases for data retrieval and storage, enabling detailed reconciliation workflows and audit trails.

Automated Reporting and Data Validation System

- Engineered a **Python**-based system to automate the generation of daily and weekly operational reports, consolidating data from multiple sources via **SQL** queries.
- Built data validation routines using **pandas** to identify discrepancies in financial transaction data, catching an average of **15** critical errors per week before downstream processing.
- Containerized the reporting service with **Docker** for consistent deployment across development and production environments.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
