PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Analyzed forecasted demand, inventory levels, and sell-through velocities for a product portfolio, contributing to optimal service levels across **30+ retail stores**.
- Evaluated planning risks and developed contingency plans, successfully mitigating potential disruptions for **new product introductions** and seasonal strategies.
- Collaborated with internal departments including Supply Demand Management, Logistics, and Retail Finance to ensure seamless execution of merchandising objectives and promotions.
- Partnered with the Data Science team to explore the **automation of supply/demand processes** and the application of **machine learning models** for business insights.
- Managed end-to-end product portfolio planning, including analysis and presentation of data in **executive reviews** to drive key business decisions.
- Designed and implemented improvements to planning processes, identifying opportunities for innovation that yielded **measurable benefits in operational efficiency**.
- Containerized supply chain planning applications using **Docker** and deployed them to **AWS EC2 instances** managed via Jenkins CI/CD pipelines.

SKILLS

Planning & Analysis – Demand Forecasting, Inventory Management, Sell-Through Velocity Analysis, Risk Evaluation, Contingency Planning, Merchandising, Planograms, Promotions

Data Visualization & Reporting – Power BI, Tableau, DAX, Data Modelling, Data Warehousing, ETL, Data Analysis

Programming & Scripting – Python, SQL, Java, Spring Boot, R

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Operations & Collaboration – Supply Chain Operations, Retail Fulfilment, Logistics, Cross-functional Collaboration, Business Process Improvement, Machine Learning Models

PROJECTS

Retail Demand Forecasting Enhancement (HCL Technologies)

- Developed Python scripts to automate the extraction and analysis of historical sales data and inventory levels from relational databases.
- Built interactive **Power BI dashboards** to visualize demand trends, forecast accuracy, and inventory status for retail operations teams.
- Implemented data quality checks and validation routines, reducing data-related discrepancies in forecasts by **18%**.

Supply Chain Process Automation Initiative

- Engineered automated workflows using Python and SQL to streamline the reconciliation of supply orders against forecasted demand.
- Created a **machine learning model** using scikit-learn on historical sales data to predict sell-through velocities, achieving a **~0.78 R-squared** on validation sets.
- Collaborated with business analysts to gather requirements and present findings on process improvement opportunities to stakeholders.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
