PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Prepared and distributed weekly and monthly performance reports encompassing sales, margin, waste, availability, stock, and promotional data for the food category.
- Assisted the Food team in analysing product, category, and store performance, identifying key trends and exceptions for management review using **Excel** and **Power BI**.
- Maintained accurate trackers and reports for product information, ensuring data integrity and promptly identifying and escalating any discrepancies or issues.
- Provided administrative support to the Food category team, assisting Buyers and Category Managers with daily activities including invoice administration and supplier information management.
- Collaborated with the Supply Chain team to monitor stock availability and deliveries, helping to escalate potential supply risks and delivery issues.
- Supported the coordination of new product launches, range changes, and promotional activities, ensuring accurate communication of relevant information to stakeholders.
- Contributed to process improvement initiatives, identifying opportunities to enhance the efficiency and accuracy of routine reporting and administrative tasks within the Food team.

SKILLS

Reporting & Analysis – Sales Reporting, Margin Analysis, Waste Monitoring, Stock Management, Promotional Performance, Trend Identification, Data Analysis

Commercial Administration – Invoice Administration, Reconciliation, Supplier Management, Pricing Management, Product Set-up, Recipe Management

Data Tools – Microsoft Excel, Power BI, Tableau

Supply Chain Support – Stock Availability, Delivery Monitoring, Supply Issue Escalation

Project Coordination – New Product Launches, Range Changes, Promotional Activity Support

Process Improvement – Administrative Process Enhancement, Reporting Efficiency

PROJECTS

Food Category Performance Analytics Dashboard

- Developed a **Power BI** dashboard to visualise weekly and monthly food category performance metrics, including sales, margin, waste, and stock levels.
- Integrated data from multiple sources using **Power Query** to create a unified dataset for analysis, ensuring data accuracy and consistency for reporting.
- Generated automated reports highlighting key trends, exceptions, and variances in product and store performance for the Commercial Food team.

Retail Operations Data Tracking System

- Created and maintained **Excel** trackers for product information, supplier details, and promotional calendars, ensuring data accuracy and accessibility for the team.
- Automated the generation of daily stock availability and delivery status reports using **Python** scripting, reducing manual effort by 40%.
- Supported the reconciliation of supplier invoices, investigating discrepancies and collaborating with internal teams to resolve issues promptly.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021
