PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed the **Solvency II Pillar 3 reporting** process, including the generation and submission of **QRTs**, **SFCR**, and **RSR** for multiple entities.
- Drove **Solvency II Pillar 1 valuations**, focusing on accurate calculation of **technical provisions** and **Solvency Capital Requirement (SCR)**.
- Contributed to **Solvency II Pillar 2 compliance** initiatives by supporting the development and implementation of **Risk Policies** and defining **Risk Appetite** frameworks.
- Developed **SQL scripts** to extract and transform data for internal and external reporting requirements, ensuring data integrity for the annual **SII returns**.
- Automated data aggregation for regulatory reporting using **Python scripting**, reducing manual processing time by approximately **30%**.
- Collaborated with local and foreign regulatory entities, providing necessary documentation and analysis for compliance audits and inquiries.
- Containerized analytical workloads using **Docker** and deployed them on **AWS EC2** instances for efficient processing and scalability.

SKILLS

Regulatory Reporting – Solvency II, Pillar 1, Pillar 2, Pillar 3, QRTs, SFCR, RSR, SII returns

Data Analysis & Reporting – SQL, MS Excel, Data Extraction, Data Transformation, Data Aggregation, Business Intelligence

Programming & Scripting – Python, Bash Scripting

Cloud & Containerization – AWS (EC2), Docker

Risk Management – Risk Policies, Risk Appetite, Risk Measurement, Actuarial Analysis

PROJECTS

Solvency II Reporting Automation (HCL Technologies)

- Developed Python scripts to automate the aggregation of financial data from disparate sources for **Solvency II Pillar 3 reporting**.
- Designed and implemented **SQL queries** to validate data accuracy and consistency for **QRT** and **SFCR** submissions, reducing data error rates by **15%**.
- Created operational dashboards in **Power BI** to visualize key solvency metrics and track reporting progress for business stakeholders.

Technical Provisions Calculation Engine (HCL Technologies)

- Built a Python-based engine to calculate **technical provisions** and **Solvency Capital Requirement (SCR)**, adhering to regulatory guidelines.
- Integrated with existing **PostgreSQL** databases to fetch historical data and actuarial assumptions for valuation models.
- Wrote detailed documentation and ran knowledge transfer sessions for the operations team on the engine's functionality and maintenance.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
