# HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

## PROFESSIONAL EXPERIENCE — 3.5 YEARS

**Software Engineer — HCL Technologies, Chennai, India** Sep 2021 – Jan 2025

- Developed and deployed **Python** scripts for automating data ingestion pipelines, reducing manual processing time by approximately **40%**.
- Analyzed application and infrastructure telemetry using **Splunk** and **CloudWatch** to identify root causes of P1/P2 incidents and ensure SLA adherence.
- Designed and implemented **Java Spring Boot** REST APIs for new microservices, integrating with existing enterprise systems and ensuring consistent data exchange.
- Researched and documented new threat actor TTPs, mapping findings to the **MITRE ATT&CK; framework** for inclusion in detection rules.
- Converted threat investigation findings into high-fidelity **detection rules** and telemetry content for the Aurora Focus EDR product.
- Managed **Git repositories** for collaborative development, conducting code reviews and ensuring adherence to branching strategies for timely production releases.
- Containerised Python-based internal tooling with **Docker** for consistent deployment across development and production environments on **AWS EC2**.

## SKILLS

**Threat Intelligence** – MITRE ATT&CK; Framework, Threat Actor TTPs, Malware Analysis, Phishing Analysis, Vulnerability Exploitation, Supply Chain Attacks, Data Breaches, Threat Research

**Programming & Scripting** – Python, Bash, Regex

**Endpoint Security** – EDR, SIEM, XDR, Lolbins, Lolbas

**DevOps & CI/CD** – Git, GitHub, GitLab, Jenkins, Docker, AWS

**Data Analysis & Databases** – SQL, Json, Databricks, PostgreSQL

**Operating Systems & Tools** – Linux, MacOS Terminal, Windows Sysinternals, VMware Workstation

## PROJECTS

### Automated Threat Telemetry Pipeline

- Developed a **Python** pipeline to process raw logs from various sources, transforming them into structured telemetry data for threat analysis.
- Implemented **regex** patterns to parse and extract key indicators from unstructured log data, increasing detection accuracy by **15%**.
- Containerised the pipeline using **Docker** and deployed it on **AWS Lambda** for scalable and efficient execution, handling over **5,000** events per hour.

### Threat Research Automation Tool

- Created a **Python** CLI tool to automate the generation of threat intelligence reports based on **MITRE ATT&CK;** mappings.
- Integrated the tool with **Git** for version control of research output and documentation, streamlining content creation for the threat content team.
- Enabled rapid analysis and conversion of threat investigation data into new **detection rules**, reducing content development time by an estimated **20%**.

## EDUCATION

**M.Sc. Data Analytics — National College of Ireland, Dublin** Feb 2026

**B.E. Computer Science — SNS College of Technology, Coimbatore, India** 2021

## CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
