PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed day-to-day health of core GTM platforms including **Salesforce** configuration, user permissions, and custom object management, ensuring systems accurately reflected team workflows.
- Maintained data flow integrity across GTM toolset, including intent data and conversation intelligence platforms, ensuring reliable signal transmission between integrated systems.
- Enforced data governance standards for data quality and deduplication, collaborating with GTM Engineers to build infrastructure for credible revenue reporting and forecasting.
- Served as technical partner for GTM teams, triaging issues, gathering business requirements, and delivering scalable solutions, communicating clearly with technical and non-technical stakeholders.
- Assisted in evaluating new GTM tech and AI tools, assessing integration impact with existing systems and supporting contract renewals and implementation of emerging solutions.
- Developed Python scripts to automate data extraction and reporting from enterprise systems, improving data availability for operational analysis by approximately **40%**.
- Containerized enterprise applications using **Docker** and managed deployments on **AWS EC2** instances, streamlining the release process for new features.

SKILLS

CRM Administration – Salesforce, HubSpot, Custom Objects, Workflow Automation, User Permissions

Integration & Data Flow – Intent Data Platforms, Conversation Intelligence, Sales Engagement Platforms, Data Quality, Deduplication, Field Taxonomy

System Operations & Support – GTM Systems, Revenue Operations, Technical Partnering, Issue Triage, Business Requirements Gathering, Tooling Evaluation

Programming & Scripting – Python, SQL, Shell Scripting

Cloud & Containerization – AWS (EC2, S3, CloudWatch), Docker

PROJECTS

GTM Systems Integration & Automation (HCL Technologies)

- Designed and implemented automated data synchronization workflows between disparate enterprise systems using **Python scripting** and **SQL queries**, reducing manual data entry by **65%** for the operations team.
- Developed REST APIs in **Java Spring Boot** to facilitate cross-system data exchange for a financial-services dashboard, improving data accessibility for reconciliation processes.
- Configured and maintained CI/CD pipelines using **Jenkins** and **Git** for automated testing and deployment of integrated system updates, reducing deployment lead time by approximately **30%**.

Customer Operations Dashboard Enhancement (HCL Technologies)

- Contributed to the development of a payments operations dashboard, focusing on transaction monitoring and operational alerting for failed payment messages.
- Wrote **SQL queries** against PostgreSQL and Oracle databases for data validation and to support ad-hoc reporting requests from business analysts, ensuring data accuracy for operational metrics.
- Supported production environments with strict SLAs, implementing monitoring through **Splunk** and responding to P1/P2 incidents to maintain system stability.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
