PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Diagnosed and resolved technical faults on **solar PV systems**, **inverters**, and **EV chargers** for service contract customers using remote monitoring platforms.
- Responded to customer inquiries via phone and email, translating complex **technical issues** into clear, understandable language to maintain customer satisfaction.
- Provided technical guidance to on-site **installers and subcontractors**, clarifying system configurations and installation best practices.
- Prepared detailed **energy monitoring reports** for service contract clients, highlighting system performance metrics and actionable recommendations for improvement.
- Logged, updated, and managed support cases within **Zoho CRM**, ensuring accurate tracking of issue resolution and assignment of tasks to field engineers.
- Analyzed recurring fault patterns across **heat pump systems** and fed insights back to design and installation teams to drive continuous improvement in product reliability.
- Managed a caseload of approximately **15-20 support tickets** daily, prioritizing urgent issues and ensuring timely resolution to meet service level agreements.

SKILLS

Renewable Energy Systems – Solar PV, Batteries, EV Chargers, Heat Pumps

Troubleshooting & Diagnostics – Remote Fault Finding, Electrical Schematics, Mechanical Schematics, Error Code Analysis

Customer Support – Technical Explanations, Case Management, Zoho CRM, Communication

Tools & Technologies – GoodWe, Huawei, Sofar, Solis, SAJ, Sigenergy, myenergi, Mitsubishi, Thermia

General IT – Linux, Shell Scripting, Data Analysis, Python, SQL

PROJECTS

Remote Solar PV and Battery System Diagnostics

- Developed a Python script to parse and analyze logs from various **solar inverters** (GoodWe, Huawei), identifying common error codes and performance anomalies.
- Created a structured troubleshooting guide for common **PV system faults**, reducing average diagnostic time by **18%** for the support team.
- Simulated remote diagnostics scenarios for **battery storage systems**, mapping potential issues to specific error codes and recommended resolution steps.

Customer Energy Performance Reporting Tool

- Designed and implemented a data processing pipeline using **Python** and **Pandas** to aggregate energy generation and consumption data from customer sites.
- Built interactive **dashboards** with **Power BI** to visualize system performance, highlighting key metrics such as energy yield, self-consumption rates, and CO2 savings.
- Authored accompanying narrative explanations for reports, translating technical data into business-relevant insights for non-technical **service contract customers**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
