HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Provided daily technical support and troubleshooting for biologics manufacturing equipment, ensuring operational readiness and adherence to GMP standards.
- Developed and implemented new operational procedures and training materials to enhance equipment performance and user proficiency across the manufacturing floor.
- Led technical problem-solving sessions to identify root causes of equipment failures, contributing to process improvement initiatives that reduced downtime by **15%**.
- Contributed to the development and execution of validation protocols for new and modified manufacturing equipment, ensuring compliance with regulatory requirements.
- Collaborated with cross-functional teams, including process engineers and quality assurance, to support lean manufacturing principles and achieve alignment on production goals.
- Gained hands-on expertise in the operation and maintenance of **aseptic filling** and **lyophilization systems** within a GMP-regulated environment.
- Managed incident response for critical manufacturing systems, resolving P1/P2 issues and restoring service within defined SLAs using **Splunk** and **Dynatrace** for monitoring.

SKILLS

Manufacturing Equipment – Installation, Maintenance, Troubleshooting, Process Improvement, Validation Protocol Development, Lean Manufacturing, GMP Compliance

Software & Tools – Jira, Confluence, Git, Jenkins, Splunk, Dynatrace, CloudWatch

Programming Languages – Java, Python, SQL

Cloud & Containerization – AWS (EC2, S3, Lambda), Docker

Databases – PostgreSQL, MySQL, Oracle

Analytics & BI – Power BI, Tableau, DAX, Power Query, R / RStudio

Operating Systems – Linux

PROJECTS

Biologics Equipment Uptime Optimization (HCL Technologies)

- Engineered Python scripts to automate the collection of performance metrics from manufacturing equipment, enabling proactive identification of potential failures and reducing unscheduled downtime by **18%**.
- Designed and implemented a real-time monitoring dashboard using **Power BI** to visualize key performance indicators for critical biologics production lines, providing actionable insights to operations teams.
- Supported the integration of new equipment into existing manufacturing workflows, coordinating with external vendors and internal process engineers to ensure seamless deployment and validation.

Automated Production Reporting System (HCL Technologies)

- Developed a Python-based ETL pipeline to extract, transform, and load data from multiple production databases (PostgreSQL, Oracle) into a central data warehouse for reporting.
- Created scheduled reports and alerts using **Python scripting** and SQL queries to inform stakeholders about production yields, batch status, and equipment maintenance needs.
- Collaborated with business analysts to refine reporting requirements and ensure the accuracy and relevance of the generated output for operational decision-making.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
