PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Monitored **server infrastructure** and **operational alerts** across multiple platforms, identifying and assessing availability risks and service degradations for enterprise applications.
- Triaged incoming alerts from **Splunk** and **Dynatrace**, determining severity and business impact, and initiating response actions according to established operational procedures.
- Investigated routine infrastructure issues on **Linux** and **AWS EC2** instances, identifying abnormal conditions and escalating critical or unresolved problems to senior engineering teams.
- Supported incident response activities for service disruptions, conducting preliminary investigations to identify contributing factors and assess impact on system availability.
- Coordinated with infrastructure engineering and other technical teams to facilitate timely incident resolution and recovery, maintaining accurate incident records and timelines.
- Monitored server and infrastructure **change activities**, identifying potential risks and unexpected behaviours, and supporting cross-functional coordination during planned change windows.
- Updated **Standard Operating Procedures (SOPs)** and operational runbooks based on incident findings and recurring issues, contributing to continuous improvement initiatives.

SKILLS

Monitoring & Observability – Splunk, Dynatrace, AWS CloudWatch

Incident Management – Incident Response, Root-Cause Analysis, Escalation Procedures, SLA Management, P1/P2 Incidents

Operating Systems – Linux, Windows

Cloud Platforms – AWS (EC2, S3, Lambda)

Scripting & Automation – Python, Shell Scripting

Change Management – Change Monitoring, Change Control, UAT Support

Documentation – SOPs, MOPs, Runbooks, Confluence

PROJECTS

Enterprise Application Monitoring and Alerting

- Implemented enhanced monitoring for critical enterprise applications using **Splunk** and **Dynatrace**, correlating system logs and performance metrics to proactively identify potential issues.
- Developed automated Python scripts to parse and aggregate alert data, reducing manual triage time by approximately **30%** and improving incident detection accuracy.
- Contributed to the creation and maintenance of operational runbooks and documentation for P1/P2 incidents, ensuring clear escalation paths and resolution steps for the support team.

Production Incident Triage and Resolution

- Managed the triage of over **150** production incidents, performing initial impact assessments and coordinating with cross-functional teams for swift resolution.
- Conducted root-cause analysis for recurring system anomalies, documenting findings and recommending preventive actions to improve overall service stability on **Linux** environments.
- Participated in on-call rotations, responding to critical alerts and ensuring adherence to service level agreements (SLAs) for key business applications.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
