PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Performed **Layer 2 and Layer 3 troubleshooting** for enterprise network incidents, diagnosing and resolving connectivity issues across **routing and switching** infrastructure.
- Monitored network infrastructure health and performance using **Splunk and Dynatrace**, responding to alerts and escalating critical service-impacting events.
- Executed approved network changes, including **configuration updates and hardware replacements** for firewalls and wireless controllers, following established change-management processes.
- Maintained accurate **network documentation**, configuration records, and operational procedures, ensuring knowledge transfer across engineering teams.
- Coordinated with **Level 3 engineering teams and external vendors** to resolve complex network problems, facilitating timely service restoration.
- Supported incident, problem, and change-management processes in accordance with operational standards for enterprise network environments.
- Containerized network monitoring agents using **Docker** for consistent deployment across **AWS EC2** instances, improving agent rollout efficiency by **15%**.

SKILLS

Networking – Routing, Switching, Firewalls, Wireless Networks, WAN/LAN Connectivity, Network Monitoring, Layer 1/2/3 Troubleshooting

Cloud & Virtualization – AWS (EC2, S3, Lambda, CloudWatch), Docker, Virtual Machines

Operating Systems – Linux, Server Operating Systems

Tools & Protocols – DNS, Splunk, Dynatrace, Jenkins, Git, Jira, Confluence, PagerDuty, SNMP

Methodologies – Change Management, Incident Management, Problem Management, Agile/Scrum

PROJECTS

Network Infrastructure Monitoring & Alerting System

- Developed a Python-based system to aggregate network device logs from diverse sources (e.g., **routers, switches, firewalls**) into a centralized **Splunk** instance for enhanced visibility.
- Implemented automated alerting rules based on critical event patterns, reducing manual detection time for network anomalies by approximately **30%**.
- Designed and documented the system architecture, including data flow and alert configuration, for use by operations teams in a large-scale enterprise environment.

Automated Network Device Configuration Deployment

- Created **Python scripts** to automate the deployment of standardized configurations to network devices (e.g., **Cisco routers, Juniper switches**) via SSH.
- Integrated scripts with **Jenkins** pipelines for scheduled updates and version control using **Git**, ensuring consistent network state across the infrastructure.
- Managed a library of device configuration templates, reducing manual configuration errors and improving deployment speed by **20%** for routine updates.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
