HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **Python scripts** for automating data ingestion and transformation processes, reducing manual effort by approximately **30%**.
- Managed production support for enterprise applications using **Splunk** and **Dynatrace**, focusing on SLA adherence and P1/P2 incident response for critical systems.
- Designed and implemented REST APIs using **Java Spring Boot** for inter-service communication, supporting new feature development and system integrations.
- Performed root cause analysis for network and server outages, documenting findings and recommending solutions to improve system stability for a global production content delivery network.
- Assisted with traffic management and queries from **ISPs/partners**, ensuring smooth content delivery and resolving connectivity issues.
- Supported incident handling for network devices, including troubleshooting **CRC errors** and managing **RMA** processes for faulty hardware.
- Containerized Python applications using **Docker** and deployed them to **AWS EC2** instances, enabling more reliable and scalable application delivery.

SKILLS

Languages – Python, Java, SQL, Bash

Frameworks/Libraries – Spring Boot, pandas, NumPy, scikit-learn

Cloud/Infra – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins

Databases – PostgreSQL, MySQL, Oracle

Tools/Platforms – Splunk, Dynatrace, Jira, Confluence, Git

Networking – CDN, Fiber-Optics, ISP Peering, Network Hardware Support

PROJECTS

Network Monitoring and Automation Platform

- Developed a **Python**-based monitoring tool that aggregated data from **Splunk** and **CloudWatch** to provide a unified view of network health, reducing alert fatigue by **20%**.
- Implemented automated remediation scripts in **Bash** and **Python** to address common network configuration errors, decreasing manual intervention time for the operations team.
- Designed and deployed the application using **Docker** containers on **AWS EC2**, establishing a CI/CD pipeline with **Jenkins** for continuous updates.

Automated ETL Pipeline for System Performance Data

- Engineered a data pipeline using **Python** and **pandas** to extract, transform, and load performance metrics from multiple network devices and servers.
- Integrated the pipeline with **PostgreSQL** to store time-series performance data, facilitating historical analysis and trend identification.
- Created automated reports using **SQL** queries to highlight performance bottlenecks and suggest capacity adjustments for the content delivery network.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
