PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Performed in-depth troubleshooting of **optical transport (DWDM)** and **IP routing (BGP, OSPF)** networks, analyzing **optical power levels** and **routing tables** to isolate faults across layers.
- Owned end-to-end resolution for complex incidents, including coordinating technical resources, engaging with vendor TACs (e.g., **Juniper, Ciena**), and performing stakeholder communication for **major service-impacting events**.
- Executed scheduled network maintenance and change activities, including **method-of-procedure (MOP) review** and pre/post checks, ensuring adherence to **change management procedures**.
- Authored and improved **runbooks** and **knowledge-base articles** for optical and IP network operations, enhancing team efficiency and reducing incident resolution times by approximately **15%**.
- Mentored and guided **Network Operations Engineers I** through knowledge transfer sessions and shadowing, improving their troubleshooting capabilities on complex issues.
- Recommended improvements to **monitoring and alarm correlation** tooling, identifying opportunities for scripting automation to reduce operational noise and improve fault detection.
- Containerized network automation scripts using **Docker** and managed deployments on **AWS EC2** instances for consistent execution across the operational environment.

SKILLS

Network Protocols – IPv4, IPv6, MPLS, BGP, OSPF

Optical Technologies – DWDM, CWDM, Fiber Optics, OSNR, BER

Hardware Vendors – Cisco, Juniper, Ciena, Nokia, Infinera

Troubleshooting & Monitoring – Incident Management, Root Cause Analysis, Splunk, Dynatrace, CloudWatch

Automation & Scripting – Python, Shell Scripting, Jenkins, Git

Cloud & Containerization – AWS (EC2, S3, Lambda), Docker

Operating Systems – Linux

PROJECTS

Network Incident Resolution and Automation

- Developed Python scripts to automate the analysis of **network logs** from **Splunk** and **Dynatrace**, identifying recurring issues and reducing manual review time by **40%** for P1/P2 incidents.
- Built and maintained **CI/CD pipelines** using **Jenkins** for deploying network automation scripts to **AWS EC2** instances, ensuring rapid and reliable updates.
- Documented troubleshooting procedures for common network faults, contributing to a knowledge base that supported the onboarding of **two junior engineers**.

IP Network Performance Enhancement

- Analyzed **BGP and OSPF routing tables** across multi-vendor equipment (**Juniper, Cisco**) to optimize traffic paths and improve network stability for enterprise clients.
- Implemented proactive monitoring checks for **optical power levels** and **OSNR** using custom Python scripts integrated with **AWS CloudWatch**, preventing potential fiber optic link degradations.
- Created shell scripts for automated data collection from network devices, streamlining the process for **vendor TAC** case submissions and reducing case resolution time by an average of **10%**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
