HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed production support and incident response for global content delivery network deployments, resolving P1/P2 issues within defined SLAs using **Splunk** and **Dynatrace**.
- Developed Python scripts to automate network monitoring tasks and generate scheduled reports on ISP/partner performance, reducing manual analysis time by approximately **15%**.
- Assisted in troubleshooting and resolving various hardware and software issues on multi-vendor servers, including handling switch incidents related to CRC errors and RMAs.
- Collaborated with ISPs and vendors to diagnose and fix network connectivity problems, ensuring stable communication across global peering strategies.
- Participated in on-call rotation for 24/7 support, addressing critical network and server outages across international teams.
- Analyzed network traffic patterns and responded to queries from ISP partners, facilitating smoother data flow and service delivery.
- Documented root cause analysis for network and server outages, implementing corrective actions to prevent recurrence and improve overall system stability.

SKILLS

Networking – CDN, network peering, ISP communication, fiber-optic technology, cable types, connector types, optic types, patch panels, optical transport technologies

Server Technologies – server hardware, content delivery performance, capacity planning

Support & Operations – production support, incident response, SLA management, root cause analysis, traffic analysis, network monitoring, P1/P2 incidents, on-call rotation

Scripting & Automation – Python, shell scripting

Tools & Systems – Splunk, Dynatrace, Linux, Git, Jira, Confluence, Jenkins, AWS (EC2, S3, Lambda, CloudWatch), Docker

PROJECTS

Global CDN Performance Enhancement Initiative

- Engineered Python scripts to automate the monitoring of CDN cluster health and performance metrics across multiple vendor environments.
- Analyzed server hardware configurations and network topology to identify bottlenecks affecting content delivery speed, recommending optimizations.
- Collaborated with cross-functional teams to implement changes, improving the stability of the production content delivery network.

Network Incident Triage and Resolution Framework

- Developed a standardized process for triaging network and server incidents, including detailed steps for root cause analysis using logs from **Splunk** and **Dynatrace**.
- Created documentation for common switch-related issues, enabling faster resolution of input errors and hardware failures by the support team.
- Participated in simulated incident response exercises to refine communication protocols with ISP partners and colocation facilities.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
