PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** REST APIs, handling approximately **1,500 requests per minute** for internal enterprise systems.
- Implemented robust data validation and error handling for complex data ingest pipelines using **Python** and **pandas**, reducing data quality issues by **22%**.
- Managed production support for critical enterprise applications, resolving **P1/P2 incidents** within strict SLAs using **Splunk** and **Dynatrace** for root cause analysis.
- Collaborated with cross-functional teams to gather requirements for new feature development and system enhancements, participating in **Agile Scrum ceremonies**.
- Designed and implemented database schema changes and optimized complex **SQL** queries across **PostgreSQL** and **Oracle** databases, improving query performance by an average of **18%**.
- Contributed to the development and maintenance of CI/CD pipelines using **Jenkins** and **Git** for automated builds, testing, and deployments.
- Containerized multiple Java Spring Boot applications using **Docker** and deployed them to **AWS EC2** instances, improving deployment consistency and reducing setup time.

PROJECTS

Enterprise Resource Planning System Integration Support

- Supported and integrated with core **ERP modules** and operational platforms, ensuring seamless data flow between disparate systems.
- Managed change control processes for system configuration updates and coordinated User Acceptance Testing (UAT) for critical business system deployments.
- Facilitated cross-system integrations via **REST APIs** and direct database connections, processing approximately **500,000 records** weekly across interconnected platforms.

Financial Operations Dashboard Enhancements

- Developed new features and performed production support for a **payments operations dashboard** used by a financial-services client, focusing on transaction monitoring and alerting for failed messages.
- Implemented enhancements to reconciliation workflows and operational alerting mechanisms, improving the team's ability to identify and resolve stuck payment messages.
- Collaborated with business analysts and operations teams to refine requirements and support UAT for dashboard updates, ensuring alignment with client needs and regulatory awareness.
