PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained Java Spring Boot REST APIs for enterprise systems, implementing robust error handling and logging mechanisms across 5 core microservices.
- Designed and implemented database schemas and data access layers using **Hibernate** and JPA for a customer-facing portal, managing over 10,000 unique user records.
- Authored JUnit and Mockito tests for Java components, achieving an average code coverage of 85% for new feature development and reducing production defects by 15%.
- Collaborated with cross-functional teams to gather requirements and define technical specifications for new feature development in an Agile Scrum environment.
- Participated in code reviews for junior engineers, providing constructive feedback to ensure code quality and adherence to architectural standards.
- Managed and deployed applications using **Docker** containers on **AWS EC2** instances, configuring auto-scaling groups and load balancers for high availability.
- Supported production systems by analyzing logs in **Splunk** and **Dynatrace**, responding to P1/P2 incidents, and ensuring adherence to defined SLAs.

SKILLS

Languages – Java, Python, SQL, R

Frameworks/Libraries – Spring Boot, Hibernate, JPA, pandas, NumPy, scikit-learn

Databases – PostgreSQL, MySQL, Oracle

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Tools/Platforms – Jira, Confluence, Splunk, Dynatrace, Power BI, Tableau

Methodologies – Agile, Scrum

PROJECTS

Enterprise Java Application Modernization

- Refactored a monolithic Java application into a microservices architecture using **Spring Boot** and **Hibernate**, improving system maintainability and enabling independent deployments.
- Implemented RESTful APIs for inter-service communication and external integrations, handling approximately 500 requests per second during peak load.
- Containerized the new microservices using **Docker** and deployed them to an **AWS EKS** cluster, automating CI/CD pipelines with **Jenkins** for streamlined releases.

Data Migration & Validation Tool

- Developed a **Python** script to automate the extraction, transformation, and loading (ETL) of data from legacy Oracle systems to a new **PostgreSQL** database.
- Wrote **SQL** validation queries to compare data integrity between source and target databases, identifying and rectifying ~1,200 data discrepancies before the final cutover.
- Built a command-line interface using **argparse** to manage migration configurations and logging, providing clear status reports on the migration process.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
