HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed **Python** scripts to automate data ingestion and transformation for security analytics platforms, processing approximately 50,000 records daily.
- Engineered **SQL Server Integration Services (SSIS)** packages to build robust ETL pipelines for enterprise data warehousing, incorporating conditional workflows and error handling.
- Designed and implemented **SQL Server** database schema changes, including indexing strategies and constraint management, to optimize query performance for large-scale datasets.
- Created **SQL** queries within enterprise asset enumeration tools to map, measure, and report on network endpoints and assets, supporting vulnerability risk assessments.
- Authored **Python** scripts for ad-hoc analysis of infrastructure and vulnerability data to support partner Information Security teams, providing clear vulnerability risk communication.
- Developed and maintained **Power BI** reports and visualizations to present operational data and insights to cyber leadership and broader risk teams.
- Containerized backend services using **Docker** and deployed them to **AWS EC2** instances, ensuring efficient resource utilization and deployment.

SKILLS

Languages – SQL, Python, Java

Databases – SQL Server, PostgreSQL, MySQL, Oracle

ETL & Data Integration – SSIS, Power Query, Data Warehousing

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Tools & Technologies – Docker, Jenkins, Git, Jira, Confluence, Splunk, Dynatrace, Qualys, Tanium, BladeLogic, SSRS

Reporting & BI – Power BI, DAX, Tableau, MS-Reporting Services

PROJECTS

Enterprise Asset Enumeration and Vulnerability Mapping

- Developed **SQL** scripts to query multiple enterprise data sources, consolidating information on network endpoints and associated vulnerabilities.
- Created **Python** scripts to automate data ingestion and validation from various asset discovery tools, ensuring data quality for downstream analysis.
- Designed interactive **Power BI** dashboards to visualize the bank's attack surface, highlighting key risk areas and asset topography for security leadership.

Automated Data Pipeline for Security Analytics

- Built an automated data pipeline using **Python** and **SQL Server Integration Services (SSIS)** to ingest and transform security logs and asset data.
- Implemented data quality checks and enrichment steps within the pipeline, processing over 45,000 records daily to ensure accuracy.
- Containerized the pipeline components using **Docker** for consistent deployment across development and production environments.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
