HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Analyzed and triaged disclosed **exposures** and **vulnerabilities** from multiple workstreams, researching and evaluating threats to assist in prioritization of remediation actions.
- Performed hands-on analysis of large-scale datasets using **SQL** and **Python** to map, measure, and report on the Bank's vulnerability attack surface.
- Developed and maintained visualizations and reports in **Power BI** that support operational teams and cyber leadership across Information Security.
- Created **SQL** and **Python scripts** within enterprise toolsets to query datasets and support Attack Surface Review initiatives.
- Collaborated with partner teams during **System Vulnerability Incidents** to achieve timely resolution and minimize impact.
- Automated data ingestion, transformation, enrichment, and quality validation processes using **Python** and **SQL** for ETL pipelines.
- Containerized applications using **Docker** and deployed them to cloud infrastructure, ensuring efficient resource utilization and scalable operations.

SKILLS

Cyber Security – Exposure Analysis, Attack Surface Research, Vulnerability Management, Risk Assessment, CVSS, CCSS, NIST SP-800-30, Threat Scenarios, Mitigating Controls

Data Analysis & Scripting – SQL, Python, Pandas, NumPy, Scripting, ETL, Data Ingestion, Data Transformation, Data Enrichment, Data Quality Validation

Database Technologies – SQL Server, PostgreSQL, MySQL, Oracle, Indexes, Constraints, Transaction Management, Error Handling

BI & Reporting – Power BI, MS-Reporting Services (SSRS), SQL Server Integration Services (SSIS)

Cloud & Containerization – AWS, EC2, S3, Lambda, CloudWatch, Docker, Kubernetes

Development Tools & Methodologies – Jenkins, Git, Jira, Confluence, Agile, Scrum

PROJECTS

Attack Surface Mapping and Vulnerability Triage Platform

- Developed Python scripts to automate data ingestion from various asset enumeration tools, populating a central PostgreSQL database for attack surface analysis.
- Implemented SQL queries to identify and categorize vulnerabilities based on CVSS scores and threat intelligence feeds, supporting the exposure analysis team.
- Designed and built interactive dashboards in Power BI to visualize the organization's attack surface, highlighting critical exposure points and remediation status.

Automated Vulnerability Data Pipeline

- Engineered an ETL pipeline using Python and SQL Server Integration Services (SSIS) to process and transform vulnerability scan data from Qualys and Tanium.
- Created SQL stored procedures for data validation and enrichment, ensuring data integrity for downstream reporting and risk assessment activities.
- Developed Python scripts for near real-time data ingestion, reducing the latency of vulnerability information available to the Exposure Analysis team.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
