PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained financial models in **Excel** and other tools to support budget, forecasting, and long-range planning cycles for a portfolio of energy assets.
- Prepared detailed monthly management reports, including variance analysis and sharp commentary, to provide insights into financial performance for senior leadership.
- Supported investment cases and funding analysis for strategic projects by building financial scenarios and performing sensitivity analysis.
- Collaborated with project, commercial, and asset teams to challenge assumptions and ensure accuracy in financial plans.
- Translated complex financial and operational data into clear, actionable insights for non-finance stakeholders and the board.
- Assisted in the preparation of materials and presentations for senior management and board meetings, ensuring clarity and accuracy of financial information.
- Managed and enhanced **Power BI** dashboards to visualize financial and operational data, facilitating better decision-making across the business.

SKILLS

Finance & Accounting – FP&A;, Management Accounting, Commercial Finance, Audit, Transaction Services, Financial Modelling, Budgeting, Forecasting, Long-Range Planning, Cash Flow Forecasting, Scenario Analysis, Investment Analysis, Funding Analysis, Strategic Projects

Data Analysis & BI – Power BI, Excel, Data Visualization, Variance Analysis, Financial Reporting, Operational Data Analysis

Tools & Technologies – Excel, Power BI, ERP Systems

Domain Knowledge – Energy Sector, Wind Assets, Solar Assets, Storage Assets, Project Finance, Asset Management

Soft Skills – Stakeholder Management, Business Acumen, Communication, Problem-Solving

PROJECTS

Financial Planning & Analysis for Renewable Energy Projects

- Constructed comprehensive financial models in **Excel** to forecast revenue, costs, and profitability for a pipeline of solar and wind energy development projects.
- Performed sensitivity analysis on key variables such as energy prices, operational costs, and capital expenditures to assess project financial risks and returns.
- Generated detailed reports on project financial health and performance for executive review, highlighting key drivers and potential areas for optimization.

Operational Performance Dashboard for Energy Assets

- Designed and implemented interactive **Power BI** dashboards to track key operational metrics for wind and storage assets, including generation output and downtime.
- Integrated financial data with operational data sources to provide a holistic view of asset performance and its impact on financial results.
- Collaborated with asset management teams to define reporting requirements and ensure the dashboards provided actionable insights for performance improvement.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
