PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Led forensic investigation and identification of defects arising from drug product manufacture, documenting analytical data in an electronic notebook system to cGMP standards.
- Maintained and distributed extensive defect panels used for training and characterization of automated and semi-automated visual inspection equipment for finished drug products.
- Participated in peer review of analytical data, ensuring compliance with Standard Operating Procedures for the Attribute Sciences Laboratory.
- Supported the Attribute Sciences function on cross-functional teams and programs, providing expertise on process development and defect analysis.
- Applied problem-solving tools and techniques to troubleshoot issues in drug product manufacture, contributing to the identification and resolution of production defects.
- Developed and validated analytical methods for drug product characterization, contributing to the understanding of attribute sciences within the pharmaceutical industry.
- Managed change control and variation processes for laboratory systems and analytical methods, ensuring adherence to regulatory requirements and operational integrity.

SKILLS

Domain Expertise – Analytical Chemistry, Biochemistry, Pharmaceutical Industry, Drug Product Manufacture, cGMP Standards, Regulatory Inspections, Process Development

Laboratory Operations – Visual Inspection Equipment, Defect Panels, Analytical Data, Electronic Notebook System, Standard Operating Procedures, Laboratory Safety

Data Analysis & Problem Solving – Problem-Solving Tools/Techniques, Statistical Tools, Multivariate Analysis, Data Integrity, Peer Review

Method Development – Analytical Methods, Method Validation, Troubleshooting

Project Management & Compliance – Change Control, Variation Management, Cross-Functional Teams, Influencing Decisions, Documentation

PROJECTS

Pharmaceutical Defect Analysis and Reporting System

- Designed and implemented a system for tracking and reporting defects identified during drug product manufacturing, integrating with laboratory data streams.
- Developed standardized documentation templates for forensic investigations, ensuring adherence to cGMP standards for all reported findings.
- Collaborated with quality assurance teams to validate the reporting system and ensure data integrity for regulatory submissions.

Automated Visual Inspection Equipment Characterization

- Contributed to the setup and characterization of automated visual inspection equipment by maintaining and distributing comprehensive defect panels.
- Analyzed performance data from inspection equipment to identify areas for improvement and ensure accurate defect detection rates.
- Documented equipment calibration and maintenance procedures, supporting operational continuity and compliance within the Attribute Sciences Laboratory.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
