PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Prepared and validated **daily, weekly, and monthly supply chain reports and dashboards**, ensuring data accuracy and clear presentation for operational performance monitoring.
- Monitored key performance indicators including **customer on-time delivery (OTD), supplier inbound OTD, backlog, and order cycle time**, investigating root causes for late or unfulfilled orders.
- Analyzed inventory levels and demand history to support **replenishment, purchase-order, and stock-strategy decisions**, reviewing slow-moving or at-risk stock to reduce excess inventory exposure.
- Collaborated with cross-functional teams including **Distribution Centre Operations, Purchasing, Customer Service, Sales, Finance, Quality, Trade Compliance, and IT/ERP** to resolve operational issues and improve execution.
- Supported user acceptance testing (UAT) for **ERP system updates and process validations**, documenting issues and contributing to continuous improvement activities.
- Assisted with the automation and standardization of routine reporting using **Excel and Power BI**, aiming to enhance accuracy, visibility, and efficiency in supply chain data analysis.
- Managed and maintained clear operational trackers, exception logs, and action lists, ensuring **accurate shipment documentation and escalation of issues** involving dangerous goods or customs requirements.

PROJECTS

Supply Chain Performance Dashboard and Automation

- Developed a comprehensive **Power BI dashboard** to visualize key supply chain KPIs including OTD, inventory levels, and order cycle times for EMEA operations.
- Automated the generation of daily and weekly operational reports using **Python scripting**, reducing manual data compilation effort by approximately 15 hours per week.
- Implemented data validation checks within the reporting scripts to ensure accuracy and consistency of data extracted from various sources, improving data integrity for management reviews.

ERP Integration and Data Reconciliation Support

- Supported integration efforts between legacy systems and the **Microsoft Dynamics 365 ERP** by developing **SQL scripts** for data reconciliation and validation.
- Assisted in troubleshooting data discrepancies identified during UAT for a new inventory management module, collaborating with IT teams to resolve issues affecting stock availability reporting.
- Documented data flow processes and identified master data issues that impacted lead time calculations, contributing to a **10% reduction in data-related order processing errors**.
