PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Reviewed and analyzed internal processes, risks, and controls across various business units to identify control gaps and operational inefficiencies for audit engagements.
- Contributed to audit testing and walkthroughs by documenting observations and gathering evidence to support assessments of process and control effectiveness.
- Collaborated with audit professionals and business stakeholders to translate findings into clear, actionable insights and concise written reports for senior management.
- Developed Python scripts to automate data extraction and transformation for audit analysis, reducing manual data handling time by approximately **40%**.
- Supported production environments for enterprise applications, managing incident response and SLA adherence for critical systems within a financial services context.
- Participated in Agile ceremonies, including sprint planning and daily stand-ups, to contribute to the iterative development and delivery of audit-related tools and reports.
- Containerized audit reporting tools using **Docker** and deployed them to cloud infrastructure, improving deployment consistency and reducing setup time for audit teams.

SKILLS

Audit & Risk – Internal Audit, Risk Management, Control Environment, Business Process Analysis, Professional Skepticism, Documentation Discipline, Analytical Problem-Solving

Programming Languages – Python, SQL, Java

Databases – PostgreSQL, MySQL, Oracle

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Data Analysis & BI – Power BI, Tableau, DAX, Power Query, Data Modelling, R, pandas, NumPy

Enterprise Systems – ERP Integration Support, Change Management, Jira, Confluence

Financial Services Domain – Transaction Monitoring, Reconciliation Workflows, Payments Operations Dashboard

PROJECTS

Internal Control Assessment Framework

- Designed and implemented a Python-based framework for assessing internal controls across enterprise systems, integrating with Jira for issue tracking and reporting.
- Developed automated data validation checks using **SQL** and Python to ensure accuracy and completeness of control evidence collected from various sources.
- Generated standardized audit reports and visualizations using **Power BI**, enabling stakeholders to quickly understand control effectiveness and identify areas for improvement.

Production Incident Triage and Root Cause Analysis Tool

- Built a Python application to aggregate logs and metrics from **Splunk** and Dynatrace, aiding in faster identification of root causes for production incidents.
- Created interactive dashboards within the tool to visualize key performance indicators and error patterns, supporting incident response teams in resolving P1/P2 issues.
- Implemented automated alerting mechanisms for critical system anomalies, reducing the mean time to detect issues by an estimated **20%**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
