PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Acted as a quality control function for AI-generated process comparisons, validating solution recommendations and identifying inaccuracies for an enterprise workflow automation system.
- Supported prompt optimization efforts for internal AI tools by testing various prompts and documenting their effectiveness against defined business use cases.
- Developed and maintained a library of tested prompts for deployment copilot functionalities, ensuring consistency and accuracy in AI-driven task assistance.
- Gathered and synthesized user feedback on AI effectiveness, contributing to continuous improvement cycles by recommending enhancements to AI models and interfaces.
- Designed and implemented REST APIs using **Java Spring Boot** to facilitate data exchange between AI services and core business applications, handling approximately **400 requests per minute**.
- Containerized AI validation services using **Docker** and deployed them to an **AWS EC2** environment, managing configurations and basic resource allocation.
- Analyzed AI model performance metrics and user adoption rates, generating reports that informed strategic decisions for AI feature development and deployment, contributing to a **15% increase** in user engagement.

SKILLS

AI/ML – AI Testing, Validation, Prompt Optimization, Hallucination Identification, AI Effectiveness Measurement, User Feedback Analysis, AI Model Enhancement

Programming Languages – Python, Java, SQL, R

Backend Frameworks – Spring Boot, FastAPI, Flask

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Databases – PostgreSQL, MySQL, Oracle

Tools & Technologies – Docker, Jenkins, Git, Jira, Confluence, Splunk, Dynatrace, pandas, NumPy, scikit-learn, Power BI, Tableau

PROJECTS

AI Validation Framework for Enterprise Solutions

- Developed a Python-based framework to systematically test AI-generated process comparisons and validate solution recommendations for internal business automation tools.
- Implemented automated checks to identify and flag potential AI hallucinations or inaccuracies in generated outputs, reducing manual review time by an estimated **30%**.
- Created a comprehensive prompt library for common AI use cases, enabling faster deployment of AI features and ensuring consistent user experiences.

Data Analytics & Reporting for AI Adoption

- Designed and built interactive dashboards using **Power BI** to visualize AI adoption metrics and user engagement across various internal applications.
- Wrote **SQL** queries against production databases to extract relevant data for AI effectiveness analysis, supporting approximately **50+ distinct reports**.
- Applied statistical methods and **Python** (pandas, scikit-learn) to analyze user feedback and measure AI performance, identifying key areas for improvement.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
