HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Collected and organized current-state process documentation from multiple deployment sites, cataloging procedures and work instructions to establish a baseline standard.
- Managed a process repository by creating and maintaining process metadata, establishing relationships across repositories, and ensuring content adherence to approved standards for **AI indexing**.
- Prepared process content for **AI** indexing and searchability, validating AI-generated process descriptions and assisting in training AI process comparison capabilities.
- Developed Python scripts to automate data extraction and transformation tasks for operational reporting, reducing manual effort by approximately **30%** for the analytics team.
- Designed and implemented REST APIs using **Java Spring Boot** for cross-service data exchange, incorporating request validation and circuit-breaker patterns to enhance system resilience.
- Contributed to the development and maintenance of an enterprise **Java** application, addressing bugs and implementing new features within an Agile/Scrum framework.
- Containerized several microservices using **Docker**, enabling consistent deployment across development and production environments on **AWS EC2**.

SKILLS

Process Intelligence – Process Documentation, Process Mapping, Process Repository Management, AI Indexing, AI Training, AI Searchability

Data Analytics & BI – Power BI, Tableau, DAX, Power Query, Data Modelling, SQL, R, RStudio, pandas, NumPy

Programming Languages – Python, Java, SQL, R

Frameworks & Libraries – Spring Boot, scikit-learn, pandas, NumPy

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Enterprise Systems – ERP Integration Support, Change Management, Jira, Confluence

PROJECTS

Medical Device Manufacturing Process Documentation System

- Developed a Python-based application to ingest and catalog process documentation (procedures, work instructions) from various manufacturing sites, creating a centralized repository for **process intelligence**.
- Implemented features for comparing site-specific processes against a defined standard and establishing metadata relationships across the documentation repository, supporting future **AI** analysis.
- Designed a user interface for navigating and searching the process documentation, improving accessibility for manufacturing and engineering teams and reducing time spent locating critical information by an estimated **20%**.

Automated Reporting and Data Pipeline for Operations

- Engineered Python ETL pipelines to extract, transform, and load data from disparate operational systems into a central data store for reporting purposes.
- Created automated reports using **Power BI**, visualizing key operational metrics and trends for management review, which were accessed by over **15** stakeholders weekly.
- Integrated the reporting solution with existing data warehouses using **SQL** and optimized data extraction queries, improving report generation speed by **35%**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
