PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **Python scripts** for automating data extraction and transformation tasks, improving data processing efficiency by approximately **30%** for routine reports.
- Designed and implemented **Java Spring Boot REST APIs** to support cross-system integrations, handling approximately **2,000 requests per hour** with a focus on robust error handling and logging.
- Managed production incidents for enterprise applications, performing root cause analysis and coordinating resolutions within strict **SLA targets**, contributing to a stable operational environment.
- Assisted with the preparation and analysis of **supply chain reports and KPIs**, translating business requirements into actionable data insights for departmental decision-making.
- Supported supply chain **digitalisation initiatives** by contributing to the development of automated reporting solutions and data-driven tools to enhance operational visibility.
- Analyzed **supply chain data** to identify trends and exceptions, escalating issues to relevant teams and supporting the implementation of corrective actions to optimize inventory levels.
- Containerized backend services using **Docker** and deployed them to an **AWS EC2** environment, configuring basic resource limits and monitoring through **CloudWatch**.

SKILLS

Programming Languages – Python, Java, SQL, R

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Databases – PostgreSQL, MySQL, Oracle

Tools & Technologies – Docker, Jenkins, Git, Jira, Confluence, Splunk, Dynatrace, Power BI, Tableau, Power Query, DAX

Methodologies – Agile, Scrum

Domain Knowledge – Supply Chain Analysis, Data Analytics, Business Intelligence, ERP Systems, Financial Services Operations

PROJECTS

Supply Chain Operations Dashboard

- Developed a **Power BI dashboard** to visualize key supply chain metrics including inventory levels, lead times, and supplier performance across multiple product lines.
- Engineered **Python scripts** to automate the ETL process for sourcing data from disparate systems (SQL databases, flat files), ensuring data consistency for reporting.
- Collaborated with the operations team to define reporting requirements and gather feedback, iterating on dashboard design to improve usability and decision-making support.

Automated Data Pipeline for Inventory Management

- Built a **Python-based data pipeline** to ingest and process inventory transaction data from ERP systems and external logistics providers.
- Implemented **SQL queries** for data validation and transformation, ensuring accuracy of inventory counts and stock movement logs within the pipeline.
- Designed the pipeline to flag potential discrepancies and outliers in inventory levels, reducing manual reconciliation efforts by an estimated **20%**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
