HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Monitored and triaged security alerts across a high-volume **SIEM platform**, identifying and escalating potential threats within defined SLAs.
- Investigated suspicious network activity and endpoint behaviour using **EDR tools**, correlating events to determine the scope of potential security incidents.
- Supported incident response activities by performing initial containment actions and gathering forensic data for deeper analysis, reducing escalation time by **15%**.
- Tuned detection rules within the **SIEM** to minimize false positives, improving alert quality and reducing analyst fatigue by approximately **20%**.
- Documented investigation findings and contributed to the development of incident response playbooks, standardizing procedures for common threat scenarios.
- Conducted threat hunting exercises aligned with the **MITRE ATT&CK; framework** to proactively identify and mitigate advanced persistent threats.
- Analyzed system logs from **Windows and Linux environments** to identify anomalies and potential indicators of compromise, supporting root cause analysis for security events.

SKILLS

Security Operations – SIEM, EDR/XDR, SOC, Incident Response, Threat Hunting, MITRE ATT&CK;, Security Alerts, Suspicious Activity Investigation

Operating Systems – Windows, Linux

Scripting & Querying – Python, SIEM Query Languages

Networking – TCP/IP, Network Traffic Analysis

Cloud & Infrastructure – AWS (EC2, S3, CloudWatch), Docker

Development & Automation – Java Spring Boot, REST APIs, Jenkins, Git

PROJECTS

Enterprise SIEM Alert Triage and Tuning

- Developed Python scripts to automate the initial parsing and enrichment of security alerts from a **Splunk SIEM**, reducing manual triage time for common alert types by **30%**.
- Configured and tuned correlation rules within the SIEM to accurately detect a range of known attack techniques, significantly reducing the rate of false positive alerts and improving analyst efficiency.
- Collaborated with senior security analysts to document new detection logic and update existing rules based on evolving threat intelligence and incident findings.

Linux Server Security Monitoring Automation

- Created shell scripts to collect and forward security-relevant logs from a fleet of **Linux servers** to a centralized logging platform for analysis.
- Implemented basic anomaly detection logic within the scripts to flag unusual process activity or file access patterns, providing early warnings for potential system compromises.
- Integrated log collection processes with **Jenkins CI/CD pipelines** for automated deployment and configuration management across the server infrastructure.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
