HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **automated test frameworks** for complex data pipelines, focusing on end-to-end data validation and transformation logic.
- Executed **data validation and reconciliation** procedures across large datasets, identifying and reporting discrepancies in ETL processes for a financial services client.
- Designed and implemented **SQL queries** for data extraction, integrity checks, and performance analysis within distributed data systems.
- Collaborated with development teams to define and execute comprehensive test strategies for data-centric features, ensuring adherence to quality standards.
- Performed **ETL testing** on multi-stage data ingestion and processing workflows, verifying accuracy and completeness of transformed data.
- Contributed to the creation of **test automation scripts** using Python and SQL to enhance regression testing coverage for data transformation logic.
- Managed production support escalations for data-related issues, performing root cause analysis using **Splunk** and **Dynatrace** to restore service within SLA targets.

SKILLS

Testing – SDET, Automation Testing, Data Testing, ETL Testing, Regression Testing, Data Validation, Reconciliation, Data Quality, End-to-End Testing

Data & ETL – Data Pipelines, Data Transformation, Data Ingestion, SQL, PostgreSQL, MySQL, Oracle

Programming Languages – Python, Java, SQL

Cloud & DevOps – AWS, Docker, Jenkins, Git

Tools & Platforms – Splunk, Dynatrace, Jira, Confluence

Frameworks – Spring Boot

PROJECTS

Data Pipeline Validation Framework (HCL Technologies)

- Developed a Python-based framework to automate validation checks for complex data pipelines feeding into an enterprise operations dashboard.
- Implemented **SQL scripts** to compare source and target data schemas and record counts, ensuring data integrity across ETL stages.
- Integrated the framework into the CI/CD pipeline, reducing manual data validation effort by approximately 40% per release cycle.

Financial Transactions Reconciliation Engine (HCL Technologies)

- Engineered a reconciliation engine using Java and Spring Boot to match high-volume financial transaction records from disparate sources.
- Designed and implemented RESTful APIs for data ingestion and reporting, processing an average of **~1,500 transactions** per minute.
- Wrote comprehensive unit and integration tests using JUnit and Mockito to ensure the accuracy and reliability of the reconciliation logic.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
