PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed and optimized onsite search functionality, including synonym mapping and redirect configurations, leading to a **22% reduction** in zero-result searches for key product categories.
- Maintained and quality-checked product sorting rules and category page layouts, enhancing product visibility and contributing to a **15% uplift** in click-through rates on featured items.
- Planned and executed seasonal and promotional merchandising updates across digital channels, ensuring accurate product placement and timely delivery for **5 major campaigns** per quarter.
- Developed and optimized product recommendations and cross-selling opportunities using A/B testing frameworks, improving average order value by **8%**.
- Built and maintained online promotion structures, ensuring accuracy and consistency with commercial priorities, supporting over **30 concurrent promotions** during peak sales periods.
- Collaborated with Digital Trade, Merchandising, and CRM teams to deliver integrated digital initiatives, contributing to the planning and execution of **10+ cross-functional campaigns** annually.
- Identified and documented opportunities for process efficiency improvements through process mapping and the application of **automation and AI tools**, leading to a **10% reduction** in manual merchandising tasks.

SKILLS

E-commerce Merchandising – Online Search Optimization, Product Sorting, Category Management, Promotional Planning, Product Recommendations, Cross-selling

Analytics & BI Tools – Power BI, Tableau, Google Analytics 4 (GA4), Qlik

E-commerce Platforms – Salesforce Commerce Cloud (SFCC)

Data Analysis & Reporting – Data-Driven Insights, Performance Analysis, Trend Identification, Actionable Recommendations

Programming & Scripting – Python, SQL, R

Process Improvement – Process Mapping, Automation, AI Tools, Continuous Improvement, Quality Assurance (QA)

PROJECTS

E-commerce Product Discovery Optimization

- Enhanced onsite search relevance by analyzing search logs and implementing strategic synonym and redirect rules, decreasing unserved search queries by **28%**.
- Refined category page structure and product sorting algorithms based on performance data and A/B test results, increasing conversion rates for key segments by **12%**.
- Developed interactive dashboards in Power BI to monitor key merchandising KPIs including product visibility, search performance, and promotional uplift, enabling faster trading decisions.

Personalized Recommendation Engine Implementation

- Integrated a new product recommendation system, analyzing customer behavior patterns to drive personalized suggestions and improve basket value by **7%**.
- Collaborated with the product and CRM teams to define and implement recommendation strategies across various customer touchpoints, including product pages and checkout flows.
- Conducted A/B testing on different recommendation algorithms and placements, identifying configurations that boosted engagement by an average of **18%**.
