PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained long-term and short-term production plans for jewellery business lines, aligning manufacturing capacity with demand forecasts and prioritizing production schedules.
- Monitored global stock availability and product flow across multiple distribution centers, ensuring adherence to service level objectives for luxury goods.
- Synthesized complex supply chain data into actionable insights and presented clear, narrative-driven recommendations to stakeholders, improving inventory accuracy by **18%**.
- Performed rigorous data validation and accuracy checks on planning inputs for **Anaplan** and **SAP S4** systems, ensuring reliable reporting and operational decision-making.
- Contributed to the continuous improvement of advanced planning tools and ERP systems, identifying and implementing process enhancements that reduced reporting lead times by **22%**.
- Prepared and delivered regular supply chain reporting activities, including coverage reports, production schedules, and key performance indicators for senior management.
- Containerized supply planning services using **Docker** and deployed them to a cloud environment, ensuring scalable and reliable execution of planning workflows.

SKILLS

Planning Tools – Anaplan, SAP S4, ERP Systems

Supply Chain Concepts – Supply Planning, Inventory Management, Demand Planning, Production Planning, Stock Availability, Service Level Objectives, KPIs

Data Analysis & Reporting – Data Validation, Data Accuracy, Reporting, Data Insights, Stakeholder Communication

Technical Skills – Python, SQL, Docker, Linux, Shell Scripting

Soft Skills – Analytical Skills, Problem-Solving, Communication, Collaboration, Teamwork, Proactive Attitude

PROJECTS

Jewellery Production Planning Optimization

- Developed Python scripts to automate the extraction and aggregation of production data from disparate sources, reducing manual data compilation effort by approximately **30%**.
- Implemented data validation checks for production schedules and inventory levels within the planning system, improving data integrity and reducing reconciliation errors.
- Designed and built interactive dashboards in **Power BI** to visualize production output, stock availability, and key performance indicators for supply chain stakeholders.

Global Stock Availability Monitoring System

- Engineered a data pipeline using **Python** and **SQL** to consolidate stock levels from multiple regional warehouses into a centralized database.
- Created automated alerts using shell scripting for stock levels falling below predefined thresholds, enabling proactive inventory management and preventing stock-outs for critical items.
- Integrated the monitoring system with an internal reporting tool to provide real-time visibility into product flow and stock availability across the global network.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
