PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained Java Spring Boot microservices, creating RESTful APIs for core business functionalities and ensuring seamless inter-service communication.
- Designed and implemented data persistence layers using **Hibernate** and JPA, managing complex object-relational mappings and optimizing database interactions across PostgreSQL and Oracle.
- Wrote comprehensive JUnit tests and utilized Mockito for unit and integration testing of Java components, achieving over 90% code coverage for critical modules.
- Collaborated with cross-functional teams within an Agile Scrum framework to define technical requirements, estimate sprint tasks, and participate in daily stand-ups and sprint reviews.
- Managed production incidents and performed root cause analysis for enterprise applications, responding to P1/P2 alerts using **Splunk** and **Dynatrace** to maintain service level agreements.
- Containerized Java applications using **Docker** and deployed them to AWS EC2 instances, integrating with Jenkins for automated build and deployment pipelines.
- Automated data extraction and transformation processes using **Python** scripts and SQL queries, generating scheduled reports for operational teams and supporting ETL workflows.

SKILLS

Languages – Java, Python, SQL, R

Frameworks/Libraries – Spring Boot, Hibernate, JPA, pandas, NumPy, scikit-learn, Flask, FastAPI

Databases – PostgreSQL, MySQL, Oracle

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Tools/Platforms – Splunk, Dynatrace, Jira, Confluence, Power BI, Tableau

Concepts – REST APIs, Microservices, CI/CD, Agile Methodologies, Data Analytics, Machine Learning Fundamentals

PROJECTS

Enterprise Java Application Modernization

- Refactored legacy Java components into a modular Spring Boot microservices architecture, improving system maintainability and enabling faster feature delivery for enterprise clients.
- Implemented robust data access layers using **Hibernate** and **JPA**, integrating with a centralized **PostgreSQL** database to manage over 1.5 million transaction records.
- Developed a suite of RESTful APIs to expose system functionalities, supporting integration with downstream client applications and reducing manual data entry by an estimated 40%.

Python-based Data Pipeline for Operational Reporting

- Engineered an automated data pipeline using **Python** and **pandas** to aggregate and process financial transaction data from multiple sources, streamlining reporting efforts.
- Designed and built interactive **Power BI** dashboards to visualize key operational metrics and trends derived from the processed data, enabling business stakeholders to make informed decisions.
- Developed **SQL** scripts for data validation and transformation, ensuring data integrity and accuracy for over 5,000 daily processed records before inclusion in final reports.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
