HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and built advanced Android applications for a fleet management platform, integrating device camera and GPS functionalities.
- Collaborated with cross-functional teams to define and ship new features for a mobile application suite, including user story refinement and backlog grooming.
- Worked closely with QA to diagnose and troubleshoot customer-reported defects in the Android application, implementing timely resolutions.
- Developed RESTful APIs using **Java Spring Boot** to facilitate data exchange between the backend services and the mobile client application.
- Wrote production runbooks and internal documentation that reduced onboarding time for new clients by approximately **30%**.
- Containerised the notification service with **Docker** for consistent deployment across development and production environments.
- Managed source code versions and conducted code reviews using **Git**, ensuring adherence to team coding standards and best practices.

SKILLS

Mobile Development – Android SDK, Kotlin, Java, Android Studio, MAUI, Xamarin

Device Integration – Device Cameras, GPS, Accelerometer, Bluetooth

Development Tools – Git, JIRA, Jenkins

Backend Technologies – Java, Spring Boot, REST APIs, PostgreSQL, MySQL, Oracle

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Containerization – Docker

PROJECTS

Android Fleet Management Application

- Developed core features for an Android application focused on fleet risk management, incorporating real-time location tracking and driver behaviour monitoring.
- Integrated third-party APIs for data ingestion and external service communication, enhancing application functionality and data synchronization.
- Implemented unit tests using JUnit to ensure code quality and maintainability for critical application modules.

Backend Service for Mobile Application

- Engineered a **Java Spring Boot** microservice to manage fleet data and serve as a backend for the Android mobile application.
- Designed and implemented RESTful APIs for user authentication, data retrieval, and operational commands, supporting approximately **500** concurrent users during peak hours.
- Managed database interactions using **Hibernate** with PostgreSQL, ensuring data integrity and efficient query performance for core business logic.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
