PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Provided first- and second-line technical support for electric vehicle charging equipment and associated software platforms, resolving an average of **15 complex issues per week**.
- Diagnosed and resolved technical issues related to charger functionality, connectivity, and user access, reducing **escalation rates by 22%** through effective remote troubleshooting.
- Monitored live charging infrastructure for performance and system alerts, proactively identifying and addressing potential network disruptions to maintain **high availability**.
- Guided customers through remote troubleshooting procedures and corrective actions, improving **customer satisfaction scores by 18%**.
- Configured and supported AC EV charging equipment remotely, ensuring proper setup and functionality for new installations.
- Maintained accurate records of support cases and technical fixes within a **ticketing platform**, contributing to a shared knowledge base.
- Collaborated with engineering and field-service teams to escalate and resolve complex technical issues, ensuring timely and comprehensive solutions.

SKILLS

Support & Operations – EV charging equipment, Technical Support, Customer Support, Ticketing Systems, CRM, Incident Management, SLA Management, Remote Troubleshooting, Field Service

Networking & Electrical – Basic Networking Principles, Electrical Systems, AC Charging Equipment, Connectivity

Cloud & Platforms – Cloud Platforms, IoT Protocols, Software Platforms

Tools & Software – Microsoft 365, Power BI, Tableau, Splunk, Dynatrace, Jira, Confluence

Programming & Scripting – Python, Java, SQL, Shell Scripting

Protocols & Standards – OCPP, CCS, CHAdeMO, APIs

PROJECTS

EV Charger Remote Diagnostics and Support System

- Developed a Python-based tool for remote diagnostics of EV charging stations, integrating with charger APIs to retrieve status and error logs, reducing on-site visits by **30%** for common connectivity issues.
- Implemented a centralized monitoring dashboard using **Power BI** to visualize charger uptime, performance metrics, and alert triggers across a fleet of 500+ devices.
- Created comprehensive troubleshooting guides and documented common fixes for charger functionality and user access problems, improving first-contact resolution rates for the support team.

Customer Onboarding and Technical Guidance Platform

- Designed and implemented a technical onboarding process for new enterprise customers, providing tailored guidance on charger installation and platform usage, reducing average onboarding time by **2 days**.
- Built RESTful APIs using **Java Spring Boot** to facilitate data exchange between the charging infrastructure's management platform and customer-facing applications, ensuring seamless integration.
- Provided post-sales technical support and training sessions to customer engineering teams, addressing integration challenges and ensuring successful adoption of the charging solutions.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
