PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Conducted deep-dive analyses using **SQL** and **Python** across website usage, subscriptions, and inventory data to quantify product performance and user behavior, identifying key drivers for a **15% increase** in user engagement.
- Defined and automated critical business metrics using **Looker** and **Python**, transforming abstract concepts into concrete calculations for daily executive decision-making.
- Served as a key contributor to **A/B experimentation** strategy, advising product managers on tracking requirements, metric selection, and statistical significance to improve testing outcomes.
- Partnered with Data Engineering to optimize core architecture and **clickstream logging**, contributing to the development of scalable data assets.
- Developed automated data transformations using **dbt** and **LookML**, streamlining modeling processes and resolving bottlenecks in data pipelines.
- Translated complex quantitative findings into clear key takeaways for senior leadership through concise executive communication, confidently answering probing, on-the-spot questions.
- Containerized data analysis services using **Docker** and deployed them to a **Kubernetes** cluster on **AWS**, ensuring predictable rollouts and resource management.

SKILLS

Analytics & Data Science – SQL, Python, R, scikit-learn, pandas, NumPy, statistical analysis, A/B testing, regression, hypothesis testing, time-series analysis, data modelling, data warehousing, machine learning fundamentals.

Business Intelligence – Power BI, Tableau, DAX, Power Query, Looker, LookML, business intelligence theory, dashboard development.

Programming Languages – Python, Java, SQL, R.

Cloud Platforms & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Jenkins, Git.

Backend Technologies – Java Spring Boot, REST APIs, Flask, FastAPI.

Data Engineering Tools – dbt, Snowplow (conceptual).

PROJECTS

Product Performance Analytics Dashboard

- Developed an interactive **Power BI** dashboard to visualize key product performance metrics, including user acquisition, engagement, and retention rates for a **global user base**.
- Engineered complex **DAX measures** and utilized **Power Query** to transform disparate data sources into a unified data model, enabling multi-dimensional analysis.
- Collaborated with business stakeholders to gather requirements and iterate on dashboard design, ensuring alignment with strategic objectives and facilitating data-driven decision-making.

Customer Behavior Analysis & Segmentation

- Performed exploratory data analysis using **Python** (pandas, NumPy) and **SQL** on website usage and subscription data to identify distinct customer segments.
- Applied statistical methods and **scikit-learn** to build a clustering model that segmented users based on behavior, achieving a silhouette score of **0.62**.
- Presented findings and actionable insights on customer segments to product teams, recommending targeted strategies that informed feature development and marketing campaigns.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
