PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented Java Spring Boot REST APIs for inter-service communication, processing approximately 1,500 requests per minute with p95 latency under 200ms.
- Developed Python scripts to automate data extraction, transformation, and loading (ETL) processes for daily operational reports, reducing manual effort by 15 hours per week.
- Managed production support for enterprise applications using Splunk and Dynatrace for monitoring and incident response, resolving critical P1/P2 incidents within defined SLA targets.
- Engineered and optimized SQL queries in PostgreSQL for data validation and schema updates, supporting changes across multiple interconnected business systems.
- Contributed to the development of a financial-services operations dashboard, enhancing transaction monitoring and implementing alerting for failed payment messages.
- Containerized Java applications using Docker and deployed them to AWS EC2 instances, improving deployment consistency and reducing environment setup time.
- Collaborated with cross-functional teams to gather requirements and coordinate User Acceptance Testing (UAT) for enterprise business systems during change-control management cycles.

SKILLS

Languages – Java, Python, SQL, R

Frameworks/Libraries – Spring Boot, pandas, NumPy, scikit-learn

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

Tools/Observability – Splunk, Dynatrace, Jira, Confluence

BI/Analytics – Power BI, Tableau, DAX, Power Query

Domain – Financial Services Operations, ERP Integration, Payments Processing, Transaction Monitoring

PROJECTS

Enterprise Payments Operations Dashboard Enhancement

- Developed Java Spring Boot microservices to ingest and process transaction data streams, enhancing real-time monitoring capabilities for a financial client.
- Implemented robust error handling and alerting mechanisms within the payments dashboard, reducing response time for critical operational issues by 20%.
- Wrote detailed SQL scripts for data reconciliation and validation, ensuring data integrity across upstream and downstream financial systems.

Automated Data Pipeline for Financial Reporting

- Built Python-based ETL pipelines to aggregate data from multiple sources, including relational databases and log files, for scheduled financial reporting.
- Utilized pandas and NumPy for data transformation and cleaning, preparing datasets for analysis and dashboard population.
- Deployed the Python scripts on AWS Lambda, ensuring scalable and on-demand execution for report generation.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
