HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **Python scripts** to automate data extraction and transformation for operational reporting, reducing manual processing time by **~30%**.
- Managed production incidents for enterprise Java/.NET applications, performing **root cause analysis** and coordinating resolution within strict SLA targets.
- Designed and implemented **Java Spring Boot REST APIs** for inter-service communication, supporting a **15% increase** in data processing throughput.
- Supported and troubleshot **Linux systems** in an AWS cloud environment, analyzing logs and configuring cron jobs for scheduled tasks.
- Contributed to vulnerability management efforts by developing automation scripts that apply **AI-assisted analysis** to security telemetry, reducing manual review load by **~20%**.
- Integrated AI-enabled security platforms with existing workflows, ensuring seamless data flow for **incident detection** and response processes.
- Enhanced observability of AI-enabled security platforms by developing custom **dashboards and alerts** in Splunk, improving real-time issue identification.

SKILLS

AI/ML – AI-assisted analysis, AI-enabled platforms, ML fundamentals, scikit-learn, pandas, NumPy

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, CI/CD, Kubernetes

Backend Development – Java, Spring Boot, REST APIs, Python, Flask, FastAPI

Databases – SQL, PostgreSQL, MySQL, Oracle

Observability & Monitoring – Splunk, Dynatrace, CloudWatch, Log analysis, Alerting, Dashboards

Security Operations – Vulnerability management, Incident detection, Incident response, Security platforms, Telemetry analysis

Scripting & Automation – Python, Bash, Shell scripting

PROJECTS

AI-Powered Security Telemetry Analysis

- Developed Python scripts to ingest and analyze security telemetry from multiple AI-enabled platforms, identifying anomalous patterns indicative of potential threats.
- Engineered automated alerts within Splunk based on AI-driven insights, reducing the mean time to detect critical security events by **~25%**.
- Created interactive dashboards visualizing AI model performance and security event trends for the Security Operations team, facilitating quicker decision-making.

Automated Incident Response Workflow

- Built a Python-based automation tool that integrates with incident management systems, pre-populating incident tickets with AI-generated context and affected assets.
- Implemented API integrations using JSON and webhooks to connect security platforms and orchestrate automated response actions for common threat types.
- Designed and deployed the automation service using Docker containers on AWS Lambda, ensuring scalable and on-demand execution for incident response scenarios.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
