PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **Python** test automation scripts for unit, integration, and device-level scenarios, ensuring code quality and reducing manual verification effort by approximately **40%**.
- Designed and implemented **CI/CD** pipelines using **Jenkins** and **Git**, integrating automated tests and reporting to streamline the build and deployment process.
- Collaborated with cross-functional teams to define and enhance the quality and testing approach, focusing on test strategy, coverage, and debug workflows across the software stack.
- Built tooling to improve developer workflows, including the development of **Python** scripts for AI-assisted test triage and operational support, reducing average incident resolution time by **15%**.
- Worked across the software stack, from **Linux**-level device behavior to application integration, identifying and automating the closure of quality gaps.
- Set up **metrics**, **dashboards**, and **alarms** using **Splunk** and **CloudWatch** to visualize product quality and test health, making them actionable for the engineering team.
- Containerized services using **Docker** and deployed to **AWS EC2** instances, managing configurations and resource allocation for predictable performance.

SKILLS

Languages – Python, Java, C++, SQL, R

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, CI/CD, Linux

Testing & Automation – Unit Testing, Integration Testing, Test Automation, Python Scripting, AI-assisted Test Generation

Tools & Platforms – Jira, Confluence, Splunk, Dynatrace, PostgreSQL, MySQL, Oracle

Methodologies – Agile, Scrum, Test Strategy, Quality Assurance

PROJECTS

Automated Device Integration Testing Framework

- Engineered a **Python**-based framework to automate integration tests for embedded devices, simulating real-world network conditions and user interactions.
- Integrated automated test execution into the **CI/CD** pipeline, enabling daily regression testing and providing rapid feedback on code changes.
- Developed **dashboards** to visualize test results and track quality trends, identifying critical areas for improvement in device firmware stability.

Linux System Monitoring and Alerting Tool

- Built a **Python** application for real-time monitoring of **Linux** system metrics, including CPU, memory, and disk I/O, on a fleet of development servers.
- Implemented custom alerting rules and notifications via **Splunk** integration, reducing response time for critical system issues by an average of **20%**.
- Containerized the monitoring tool using **Docker** for consistent deployment across different environments.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
