PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Established and maintained strong technical relationships with key enterprise clients, owning the technical validation phase of opportunities from qualification through to business approval.
- Partnered with Regional Sales Managers to conduct customer needs discovery meetings, translating business requirements into technical solutions for **Splunk** platform implementation.
- Developed and executed technical activity plans for clients, including running **Splunk** demonstrations, workshops, and Q&A; sessions to validate product value and drive adoption.
- Scoped and managed Proofs of Concept (POCs) with enterprise customers, defining success criteria and timelines to showcase the tangible value of **Splunk** solutions.
- Authored and delivered technical presentations and demonstrations to diverse audiences, effectively communicating the integration of **Splunk** within client workflows and tooling.
- Actively participated in internal technical enablement sessions and team meetings, contributing to process improvements and sharing insights on customer challenges and solutions.
- Managed **Linux** and **Windows** environments, performing basic network connectivity troubleshooting and supporting infrastructure configurations on **AWS**.

SKILLS

Core Technologies – Splunk, Linux, Windows, AWS, GCP, Azure, REST APIs, Python, Regular Expressions

Technical Sales & Consulting – Solutions Engineering, Technical Sales, Proof of Concept (POC), Demonstrations, Workshops, Customer Needs Discovery, Technical Relationships, Trusted Advisor

Cloud & Infrastructure – Infrastructure as a Service (IaaS), High Availability (HA), Disaster Recovery (DR), Container and Container Orchestration Technology

Observability & Analytics – Log Management, Big Data, IT Operations, Security Operations

Sales & Business Operations – Salesforce, Opportunity Management, Technical Validation, Business Validation

PROJECTS

Customer Observability Platform Implementation

- Designed and deployed a **Splunk**-based observability solution for an enterprise client, integrating data sources from across their IT infrastructure to provide centralized monitoring.
- Developed custom dashboards and alerts within **Splunk** to track key operational metrics and identify potential issues before they impacted service availability, reducing critical alerts by **18%**.
- Collaborated with the client's IT operations team to onboard their systems, conduct training on platform usage, and ensure successful integration into their existing incident management processes.

Python-based Data Ingestion Pipeline for Log Analysis

- Engineered a **Python** data pipeline to ingest and pre-process large volumes of machine data from diverse sources, preparing it for analysis within an observability platform.
- Implemented **REST API** integrations to pull data from various internal services and external systems, ensuring seamless data flow and reducing manual data collection efforts by approximately **30%**.
- Wrote and optimized **SQL** queries against PostgreSQL databases for data validation and transformation steps within the pipeline, ensuring data integrity before ingestion.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
