PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Handled inbound customer support requests via phone, AI-enabled chat, and email in both **Italian** and **English**, resolving ~15-20 tickets daily and exceeding target resolution times by 10%.
- Became a product expert on the legal AI platform, diagnosing, troubleshooting, and resolving complex technical issues for **legal professionals**, achieving a 95% customer satisfaction rating.
- Served as a trusted advisor, providing solutions and coaching that enabled customers to leverage the platform for increased efficiency in their legal work, directly contributing to feature adoption.
- Took ownership of customer issues end-to-end, collaborating with **Product** and **Customer Success** teams to resolve unique problems and establish new support processes for emergent issues.
- Identified opportunities for customers to benefit from additional products or services, effectively connecting them with the appropriate sales teams, leading to an average of 3-5 qualified leads per week.
- Captured and relayed customer feedback and market insights to **Product Management**, directly shaping the platform's growth and feature development strategy for the Italian market.
- Contributed to the development of internal knowledge base articles and troubleshooting guides, reducing average onboarding time for new support hires by **15%**.

PROJECTS

Customer Onboarding and Technical Enablement for New Market Entry

- Developed and delivered comprehensive onboarding materials and technical training sessions for **Italian legal professionals**, focusing on platform adoption and maximizing feature utilization.
- Established initial support channels and documented common troubleshooting steps for the Italian market, reducing initial support escalations by **20%** within the first quarter.
- Collaborated with the product team to translate user feedback from the new market into actionable insights for feature prioritization and platform localization improvements.

Enhancing SaaS Support Workflow Efficiency

- Analyzed existing support ticket data to identify bottlenecks and areas for workflow optimization, implementing process changes that improved average ticket handling time by **12%**.
- Authored detailed internal documentation and runbooks for complex technical issues, enabling faster resolution and consistent support quality across the team.
- Provided direct technical assistance and mentorship to junior support specialists during their initial onboarding period, ensuring alignment with team performance standards.
